Interspersed within this network are several larger, solid-colored circles in various colors: orange, red, blue, purple, and teal. William J. Rothwell, Phillip L. Ealy, Jamie Campbell, 2022-05-03 Research has shown that having a diverse organization only improves and enhances businesses Forbes and Time report that diversity is an 8 Billion a year investment However poorly implementing diversity programs have damaging effects on the organization and the very individuals these programs attempt to help Poorly implemented programs can cause peers and subordinates to question decisions and lose faith in leadership In addition it can cause even the most confident individuals to doubt their own skillset and qualifications Many organizations have turned to training to solve this complex issue Yet still other organizations have created and filled diversity and inclusion positions to tackle the issue The effects of these poorly implemented programs are highlighted during strenuous times such as the latest COVID 19 pandemic Marginalized people are more marginalized and resources and support do not reach everyone Tasks such as providing technical support conducting large group meetings or distributing work obligations without seeing employees on a daily basis becomes more challenging Complex problems cannot be solved with simple solutions Using organization development OD to develop a comprehensive change initiative can help This book outlines how properly conducting an OD change initiative can effectively increase an organization's diversity and inclusion it is grounded in research based literature on diversity and OD principles Many organizational leaders realize the key importance of diversity equity inclusion and multiculturalism in modern organizations It is only through such efforts can organizations thrive in a networked world where much work is done virtually and often across borders But a common scenario is that leaders recognizing the need for a diversity program will pick someone from the organization to launch it Perhaps the person identified for this challenge is in the HR department but has had no experience in launching diversity efforts or even in managing large scale long term organization wide change efforts But these are the challenges to be faced This book quickly identifies some reasons why diversity programs fail and how to avoid those failures The majority of the book highlights how to use OD to improve organization culture and processes to not only increase diversity and inclusion but develop overall

organization talent and prevent personal preferences and biases from hindering the selection of the best talent for positions

High-Performance Coaching for Managers William J. Rothwell, Behnam Bakhshandeh, 2022-07-05 Coaching is a necessary skill for managers It is important as a fundamental part of an organization's talent efforts including talent acquisition development and retention strategies For a coaching program to succeed in an organization it should be recognized as a useful approach throughout the organization and become part of the fabric of the corporate culture Performance Coaching for Managers provides an important tool for organizations to use to train their managers on coaching This book differs significantly from other books in the coaching market Many books on coaching cast coaches as facilitators who question their clients the coachees helping them to articulate their own problems formulate their own solutions develop their own action plans to solve problems and measure the success of efforts to implement those plans That is called a nondirective approach But this book adopts a directive approach by casting the coach as a manager who diagnoses the problems with worker job performance and offers specific advice on how to solve those problems While there is nothing wrong with a nondirective approach it does not always work well in job performance reviews in which the manager must inform the worker about gaps between what is needed the desired and what is performed the actual The significant difference between what is currently available in the market and what is offered in this book is the authors collective experience of over 70 combined years of hands on research and delivery experiences in the Human Resources Development field According to the Harvard Business Review 2015 workers generally expect their immediate supervisors to give them

honest feedback on how well they do their jobs and specific advice on what to do if they are not performing in alignment with organizational expectations When workers do not receive advice but instead are questioned about their own views they regard their managers as either incompetent or disingenuous Effective managers should be able to offer direction to their employees After all managers are responsible for ensuring that their organizational units deliver the results needed by the organization If they fail to do that the organization does not achieve its strategic goals This book gives managers direction in how to offer directive coaching to their workers

Virtual Coaching to Improve Group Relationships William J. Rothwell, Cho Hyun Park, 2020-12-28 Process consultation invented by Edgar Schein is both a skill and an organization development change effort As a skill process consultation means the ability to observe and provide feedback about small group dynamics to a work group about how well group members interact and how to improve that interaction Just as facilitators devote their time to in one word asking process consultants devote their time to in one word watching at an expert level As a change effort process consultation is a concerted effort to help members of a group work together more effectively For that reason the word process in this context should be interpreted to mean interpersonal interaction in small groups Historically process consultation has focused attention on face to face groups and their group dynamics But times are changing More work is done online or in blended online and onsite groups than face to face alone A 2017 survey of over 25 000 workers in 12 countries revealed that 62% of global workers are now working flexibly with some residential work and some virtual work The same survey found that workers believe that flexible work arrangements make them more productive and that 48% of survey respondents reported that their virtual interactions include representatives of other cultures It is true that for workers who can discipline

themselves and manage distractions at home virtual work can be more productive when commuting time is eliminated and workplace distractions are minimized Virtual work has the advantage of reducing the need for childcare slashing work wardrobe costs and cutting unproductive stressful commuting time Despite how modes of working together have changed over the years ranging from face to face to some degree of virtual video conference audio conference print only collaboration and many blended combinations and the growing need for finding ways to help people work together more effectively there has been no practical guideline of process consultation in a virtual or mixed work setting since Schein's process consultation initially focused on group dynamics in face to face settings Therefore this book aims to provide practical approaches to process consultation helping group members discover more effective ways of working together in blended virtual residential and cross cultural settings Essentially this book provides a practical how to guide for virtual coaching using step by step procedural approaches cases and helpful platforms technologies and tools It also provides information about how to use technology to support the process of improving virtual or mixed group relationship
