Longitudinal Research in Occupational Health Psychology Toon Taris, 2017-10-02 Occupational health psychology OHP involves the application of psychology to improving the quality of work life and to promoting and protecting the safety health and well being of employees Achieving these aims requires researchers and practitioners to possess in depth knowledge of the processes that are presumed to bring about the desired outcomes To date most studies in OHP have relied on cross sectional designs in examining these processes In such designs all variables of interest are measured simultaneously Although this has generated

useful insights in how particular phenomena are associated such designs cannot be trusted when it comes to drawing causal inferences association is not causation This book therefore focuses on longitudinal research designs in OHP whereby the concepts of interest are measured several times offering much stronger evidence for causal relationships The authors focus on design issues in longitudinal research such as the number of measurements chosen and the length of the time lags between these measurements and illustrate these issues in the context of applied research on topics such as the work family interface conflict at work and employee well being By doing so this volume provides a state of the art overview of current research in OHP both in terms of its findings and methodologies This book is based on a special issue of the journal Work Stress

Amplifying Management Research for the Common Good Robert H. Tiell, S. Charles Malka, 2024-03-01 How can management research promote a more applicable

and a more transparent knowledge for the benefit of individuals and organizations Looming large over this question is the challenge of repurposing management research for improving public good Co edited by R H Tiell and S C Malka the title of the book says it all Amplifying management research for the common good Lessons for curious individuals and organizations Insights from practitioners in the field In this book we sought to bridge the chasm that separates the non academic audience from the typically less accessible scientific journals We attempted to make empirical evidence more inclusive impactful and public good relevant for the non academic stakeholders that live and work in the broader community For that purpose we made available to the reader and to our chapter contributors a collection of published papers some authored by the editors of this book and others co authored with other researchers The papers cover a diverse set of business topics all of which we believe hold much relevance for management today Providing the reader with their insights on subject matter along with lessons and practical recommendations we sought experts in the field that can build on empirical research in various areas of management and then synthesize and broaden it through their expertise and work experience As a trigger we aligned each contributor with one or two empirical papers based on their background interests and professional experience Using the assigned papers as a springboard we asked each author to identify emerging themes around which they can build their chapter We wanted them to think of the book audience non academicians comprised of interested and curious individuals managers and their organizations And we wanted our authors to elaborate on practical lessons suggestions and recommendations that can make a difference in the lives of the book audience Our effort resulted in a collection of chapters covering a wide range of topics from supply chain challenges in Central America to life changing long term effects of the pandemic from delivery of services for mental health and suicide to logistics capabilities pre post Ivan in the Cayman Islands from the new workplace to labor market shortages and from new workforce service pathways and the optimization of talent to the impact of recent recessions on the youth and the unemployed and the assessment of C suit level leaders We would like to believe that the breadth of the topics covered and the amount of information being disseminated through the book chapters are meaningful practical and relevant to a wide audience of curious readers

ENDORSEMENTS I highly recommend Amplifying Management Research for the Common Good to anyone interested in shaping the workplace of the future Written by a team of experts this book provides a compelling argument for why free and open access to research is essential for improving workforce outcomes The authors explore how the current paywall system limits the dissemination of critical research findings and prevents practitioners and policymakers from accessing the latest insights and innovations As we exit a global pandemic and enter a re shaping of the world of work the nation s talent development ecosystem must innovate and scale to the need By advocating for open access to research the authors advance the forming of a more effective and equitable workforce development system This book is a must read for anyone looking to contribute to that cause Rick Maher Adaptive Human Capital Someone once observed that a crisis is a horrible thing to waste The essence of this advice is that a

crisis will always have the potential for the wise and curious to draw lessons and extract prescriptions Tiell and Malka have produced a book reflecting not only their curiosity and wisdom but also their desire to help all who follow their prescriptions The Covid 19 pandemic was a life altering crisis We should be thankful that they have not wasted the crisis thus helping us improve our personal and professional lives Lyle Sussman University of Louisville Employers and employees have experienced an amazing number of challenges and new opportunities during the past 3 years Pre Pandemic employers challenges were primarily focused on low unemployment managing wages and uncertainty for their future workforce Employees were primarily working 9 to 5 in an office building or manufacturing facility and possibly thinking about their futures As our society moves toward a Post Pandemic work environment employers have the same Pre Pandemic challenges but with a workforce that has shrunk faster than anticipated and have adjusted their priorities of work life balance and workplace preferences Whether your responsibilities involve Supply Chain Production Logistics Accounting Finance Training Education Hiring Retaining Firing personnel or you simply are seeking to pursue career and professional growth Everyone has likely experienced some amount of workplace change during the past several years The insights and perspectives shared by each author in this book are reminders of the complex business challenges employers face today and will continue to face in the foreseeable future Thank you for compiling and sharing these insights and perspectives Michael Wolf PrideStaff Louisville

Social Psychology Australian & New Zealand Edition Saul Kassin, Steven Fein, Hazel Rose Markus, Kerry Anne McBain, Lisa Williams, 2019-08-01 Using a balanced approach Social Psychology 2e connects social psychology theories research methods and basic findings to real world applications with a current events emphasis Coverage of culture and diversity is integrated into every chapter in addition to strong representation throughout of regionally relevant topics such as Indigenous perspectives environmental psychology and conservation community psychology gender identity and attraction and close relationships including same sex marriage in different cultures gendered behaviours when dating and updated data on online dating making this visually engaging textbook useful for all social psychology students Improving Adolescent Dietary Behaviour Charlotte Evans, 2020-12-10 Adolescents in many countries consume poor quality diets that include high intakes of sugary drinks and fast food and low intakes of vegetables The aims of this Special Issue on adolescent dietary behavior were to identify methods and approaches for successful interventions to improve diet quality in this age group and identify at risk subgroups that need particular attention In total 11 manuscripts were published in this Special Issue three qualitative studies that included a systematic review five cross sectional studies and three quantitative evaluations of interventions This Special Issue discusses the contribution of the studies and provides suggestions to improve the success of future interventions in adolescents It is important that adolescents are involved in the design of interventions to improve social and cultural acceptability and relevance Interventions targeting schools or communities framed within a larger food system such as issues around climate change and the carbon footprint of food may improve engagement Targeting

adolescents in areas of deprivation is a priority where diet quality is particularly poor. Potentially successful interventions also include environmental policies that impact the cost and marketing of food and drinks although evaluations of these were not included in this Special Issue.
