Research and Advanced Technology for Digital

Libraries Jose Borbinha, Thomas Baker, 2003-06-26 ECDL2000 the Fourth European Conference on Research and Advanced Technology for Digital Libraries is being held this year in Lisbon Portugal following previous events in Pisa 1997 Heraklion 1998 and Paris 1999 One major goal of the ECDL conference series has been to draw information professionals stakeholders and user communities from both the research world and from dustry into a discussion of the alternative technologies policies and scenarios for global digital libraries The success of previous conferences makes them a hard act to follow The eld of digital libraries draws on a truly diverse set of scienti c and technical disciplines In the past three years moreover global

cooperation on research and development has emerged as an urgent priority particularly in the new European Framework Programme and in the Digital Library Initiative in the United States Because of this diversity the field is perhaps still struggling for an identity But this struggle for identity is itself a source of energy and creativity Participants in this field feel themselves to be part of a special community with special people Each of us may claim expertise on a narrow issue with specific projects but the choices we make and the methods we use in local solutions can have unforeseen impacts within a growing universe of interconnected resources

Sacred Borders David Holland, 2011-02-02 Why an exasperated Jonathan Edwards asked can't we be contented with the canon of Scripture Edwards posed this query to the religious enthusiasts of his own generation but he could have just as appropriately put it to people across the full expanse of early American history In the minds of her critics Anne Hutchinson's heresies threatened to produce a new Bible Ethan Allen insisted that a revelation which spoke to every circumstance of life would require a Bible of monstrous size When the African American prophetess Rebecca Jackson embarked on a spiritual journey toward Shakerism she dreamt of a home in which she could find multiple books of scripture Orestes Brownson explained to his skeptical contemporaries that the idea drawing him to Catholicism was the prospect of an ever enlarging volume of inspiration Early Americans of every color and creed repeatedly confronted the boundaries of scripture Some fought to open the canon Some worked to keep it closed Sacred Borders vividly depicts the boundaries of the biblical canon as a battleground on which a diverse group of early Americans contended over their differing versions of divine truth Puritans deists evangelicals liberals Shakers Mormons Catholics Seventh day Adventists and Transcendentalists defended widely varying positions on how to define the borders of scripture Carefully exploring the history of these scriptural boundary wars Holland offers an important new take on the religious cultures of early America He presents a colorful cast of characters including the likes of Franklin and Emerson along with more obscure figures who confronted the intellectual tensions surrounding the canon question such as that between cultural authority and democratic freedom and between timeless truth and historical change To reconstruct these sacred borders is to gain a new understanding of the mental world in which early Americans went about their lives and created their nation
