Abstract: *Staphylococcus aureus* (S. aureus) is a gram-positive, spherical bacterium. It is one of the most common causes of infection in humans and animals. The bacterium is resistant to many antibiotics and disinfectants. It is also a major cause of food poisoning. The bacterium is found in the nose, skin, and other parts of the body. It can also be found in the environment, such as in soil and on surfaces. The bacterium is highly contagious and can spread easily from person to person or from animal to human. It is important to take precautions to avoid infection, such as washing hands frequently and avoiding contact with infected individuals or animals.
