

# Guide to Trimble GPS with Terrasync

This Guide provides the essentials for using the Trimble GPS units (Juno for 3-5 m accuracy, ProXH and GeoXH for submeter) to collect data points and other features using Terrasync. Data can be post-processed, and the setup can be configured to accept a Laser Rangefinder with Compass for offset shots. This guide documents its use with TerraSync software to collect points, lines and polygons.

For more information, see the *Terrasync Software Getting Started Guide* (224 pp) which you can download from: [http://www.trimble.com/terrasync\\_ts.asp](http://www.trimble.com/terrasync_ts.asp) and the manufacturer's Juno, GeoXH or ProXH manual.
