our own artmaking as well as a space to examine why and what we teach Lisa Hochtritt Maryland Institute College of Art An inspiring and playful resource that is much more rewarding than typical lesson planning It will surely spark your imagination with every flip of the page Hailey Adlard art educator Parkland School District PA

**Pro Business Applications with Silverlight 5** Chris Anderson, 2012-06-08 Silverlight 5 has the potential to revolutionize the way we build business applications With its flexibility web deployment cross platform capabilities rich NET language support on the client rich user interface control set small runtime and more it comes close to the perfect platform on which to build business applications It is a very powerful technology and despite its youth it is moving forward at a rapid pace and is gaining widespread popularity This book guides you through the process of designing and developing enterprise strength business applications in Silverlight 5 and C# You will learn how to take advantage of the power of Silverlight to develop rich and robust business applications from getting started to deployment and everything in between In particular this book will serve developers who want to learn how to design business applications It will introduce the patterns you will use the issues you will face and how to resolve them Author Chris Anderson who has been building line of business applications for years demonstrates his expertise through a candid presentation of how to tackle real life issues rather than just avoiding them Developers will benefit from his hard won expertise through business application design patterns that he shares throughout the book With this book in hand you will Create a fully functional business application in Silverlight Discover how to satisfy the general requirements that most business applications need Develop a business application framework

Modeling Programming Competency Natalie Kiesler, 2023-12-27 This book covers a qualitative study on the programming competencies of novice learners in higher education To be precise the book investigates the expected programming competencies within basic programming education at universities and the extent to which the Computer Science curricula fail to provide transparent observable learning outcomes and assessable competencies The study analyzes empirical data on 35 exemplary universities curricula and interviews with experts in the field The book covers research desiderata research design and methodology an in depth data analysis and a presentation and discussion of results in the context of programming education Addressing programming competency in such great detail is essential due to the increasing relevance of computing in today's society and the need for competent programmers who will help shape our future Although programming is a core tier of computing and many related disciplines learning how to program can be challenging in higher education and many students fail in introductory programming The book aims to understand what programming means what programming competency encompasses and what teachers expect of novice learners In addition it illustrates the cognitive complexity of programming as an advanced competency including knowledge skills and dispositions in context So the purpose is to communicate the breadth and depth of programming competency to educators and learners of programming including institutions curriculum designers and accreditation bodies Moreover the book's goal is to represent how a qualitative research methodology can be applied in the

context of computing education research as the qualitative research paradigm is still an exception in computing education research The book provides new insights into programming competency It outlines the components of programming competencies in terms of knowledge skills and dispositions and their cognitive complexity according to the CC2020 computing curricula and the Anderson Krathwohl taxonomy of the cognitive domain These insights are essential as programming constitutes one of the most relevant competencies in all computing study programs In addition being able to program describes the capability of solving problems which is also a core competency in today s increasingly digitalized society In particular the book reveals the great relevance of dispositions and other competency components in programming education which curricula currently fail to recognize and specify In addition the book outlines the resulting implications for higher education institutions educators and student expectations Yet another result of interest to graduate students is the multi method study design that allows for the triangulation of data and results

**Exam 70-414 Implementing an Advanced Server Infrastructure** Microsoft Official Academic Course,2015-01-12 This Microsoft Official Academic Course MOAC IT Professional curriculum prepares certification students for success every step of the way This 70 414 Implementing an Advanced Server Infrastructure exam course is the second of a series of two exams Microsoft Certified Solutions Associates MCSE candidates are required to pass to gain the MCSE Windows Server 2012 and Windows Server 2012 R2 certification These MCSE exams test the skills and knowledge necessary to design implement and maintain a Windows Server 2012 infrastructure in an enterprise scaled highly virtualized environment Passing these exams confirms students ability to plan configure and implement the Windows Server 2012 services such as server deployment server virtualization and network access and infrastructure This complete ready to teach MOAC program is mapped to all of the exam objectives
