There was indeed some centuries later than the Roman occupation a period coming down to quite modern times during which English iron mines were left almost unworked In Edward III s reign the pots spits and frying pans of the royal kitchen were classed among his majesty s jewels For the planners of the Armada the greater abundance and excellence of Spanish iron compared with English was an important element in their calculations of success In the fourteenth and fifteenth centuries the home market looked to Spain and Germany for its supply both of iron and steel After that Sweden came prominently forward and from her as late as the middle of the eighteenth century no less than four fifths of the iron used in this country was imported The reason of this marvellous neglect of what has since proved one of our main sources of wealth lay in the enormous consumption of timber which the old smelting processes entailed The charcoal used in producing a single ton of pig iron represented four loads of wood and that required for a ton of bar iron represented seven loads Of course the neighbourhood of a forest was an essential condition to the establishment of ironworks but wherever such an establishment was effected the forest disappeared with portentous rapidity At Lamberhurst on the borders of Kent and Sussex with so trifling a produce as five tons per week the annual consumption of wood was two hundred thousand cords The timber wealth of Kent Surrey and Sussex which counties were then the centres of our iron industry seemed menaced with speedy annihilation In the destruction of these great forests that of our maritime power was supposed to be intimately involved so that it is easy to understand how in those days the development of the iron manufacture came to be regarded in the light of a national calamity and a fitting subject for restrictive legislation **How Inventions Really Happen** Paul C. Wilson,2017-02-17

Inventor Innovator Entrepreneur These are today s heroes Public policies are designed to help them Investors want to fund

them Successful ones make hundreds of millions even billions of dollars Whole nations pin their hopes on these people to stimulate their economies solve their problems give them prestige on the world stage But who are they What special gifts do they have And what exactly is it that they do That is what this book is about The story of the sewing machine an invention that dramatically transformed the lives of women shows that it was brought into existence by individuals with very different aims and talents Who deserves the credit Was it the man who built a test device that made a stitch but then gave it away or lost it Or another who built a machine that barely worked but got a patent on it Then there was a man who developed it into something useful and made millions from it Or was the true inventor someone who built an innocuous device to move cloth between stitches which turned out to be the one feature no sewing machine could do without Or was he the man who made a simple machine that anyone could afford Each of these fascinating characters contributed something essential If we look closely at what they did and what they were like we ll understand how inventions really happen
