Sinness Studies Grade 12 March Exam Papers 2014 17 February:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

University Trends Jonathan Coulson, Paul Roberts, Isabelle Taylor, 2014-09-15
A university campus is a place with special resonance conjuring images of cloistered quadrangles and wood panelled libraries often echoing centuries of scholarly tradition. And yet it is also a place of cutting edge science, interactive learning, youth vibrancy and energy. It is this dual nature which makes the physical environment of a university so dynamic as well as a highly challenging landscape to design and manage successfully. Today the scale of the pressures and the rate of change facing higher education institutions are greater than ever. Squeezed public spending, rising tuition fees and the growing education ambitions of developing nations are set against a backdrop of rapid technological progress and changing pedagogies. What are the repercussions for the physical realities of university planning and architecture? And how are university campuses adapting to contend with these pressures? *University Trends* introduces the most significant widespread and thought provoking trends in campus design today. Part 1 identifies current trends such as starchitecture, large scale campus extensions, adaptive re use and international branch campuses. Part 2 profiles each trend via highly illustrated global case studies of well publicised as well as lesser known projects. The essential guide to current and future trends in campus design.

Hack Recruiting Victor Assad, 2019-07-23
Praise for *Hack Recruiting*: It is a brilliant piece of work. A must read for those of us in global corporations or companies of any size really that seek to act NOW. Julia Martensen, Head of HR Strategy and Innovation at DB Schenker. Victor Assad uncovers longstanding empirical research from I/O psychologists on how to best match job candidates to jobs and the best of today's digital technology. He sees a world that is emerging today in which AI ontologies which are identifying information and relationships about today's global and diverse workforces will make significant improvements for matching candidates to jobs while reducing recruiting cycle times, costs and selection biases. Victor points out that HR now has the digital tools it needs to dramatically transform recruiting and the role of the recruiter. HR can now build strategic talent pools, improve the employee experience and digitally collect insightful analytics that will open up a new era of understanding on what truly drives employee performance and innovation.
