G. Tilak,2020-07-24 This book offers a cutting edge contribution on the importance of secondary education and assesses the strengths and weaknesses of its growth in India Secondary education long neglected faces countless challenges and will require tremendous financial resources millions of additional trained teachers and vast infrastructure in terms of buildings laboratories libraries ICT facilities etc The book examines these critical issues with particular reference to the situation in India It analyses the status quo of secondary education and discusses the strategies and approaches needed in order to universalize it Including 20 chapters authored by eminent scholars in the field and from across the country this book gathers the outcomes of a seminar organized by the Council for Social Development on Universalization of Secondary Education The target audience includes policymakers practitioners administrators education planners researchers teachers and teacher educators with an interest in the future of secondary education Beyond Shanghai and PISA Binyan Xu,Yan Zhu,Xiaoli Lu,2021-05-07 This book seeks to illustrate the research on mathematics competencies and disposition in China according to the conceptual development and empirical investigation perspective Mathematics education in China has a distinguishing feature a focus of attention to mathematical

competency Paradoxically there has not been an explicit refined and measurable evaluation system in place to assess mathematical competency in China While academic achievement surveys or evaluations are common these can only give an overall conclusion about mathematical thinking skills or problem solving abilities In response to this deficiency China is beginning to carry out national projects that emphasize defining both a conceptual framework on core competencies in school mathematics and developing a corresponding assessment framework Thus the main focus of this volume is the current investigations of different mathematics competencies and mathematical disposition of Chinese students with the aim of promoting interaction between domestic and international student performance assessment to provide a more comprehensive understanding of mathematics competencies and disposition in mainland China and to stimulate innovative new directions in research The primary audience of this volume is the large group of researchers interested in mathematics competencies mathematics teaching and learning in China or comparative studies or the relation of the three The book will also appeal to teaching trainers or instructors as well as be an appropriate resource for graduate courses or seminars at either the master s or doctoral level
