Handbook of Drug Abuse Prevention Zili Sloboda, William J. Bukoski, 2007-08-06 There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a need to establish a baseline a reference point against which progress in the field of

prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use

Narrative Development in Adolescence Kate C. McLean, Monisha Pasupathi, 2009-11-11

 Where Have You Been Where Are You Going
 Narrative Identity in Adolescence
 How can we help youth move from childhood to adulthood in the most effective and positive way possible? This is a question that parents, educators, researchers and policy makers engage with every day. In this book we explore the potential power of the stories that youth construct as one route for such movement. Our emphasis is on how those stories serve to build a sense of identity for youth and how the kinds of stories youth tell are informed by their broader contexts from parents and friends to nationalities and history. Identity development and in particular narrative identity development concerns the ways in which adolescents must integrate their past and present and articulate and anticipate their futures. Erikson (1968) viewed in this way identity development is not only unique to adolescence and emergent adulthood but also intimately linked to childhood and to adulthood. The title for this chapter borrowed from the Joyce Carol Oates story highlights the precarious position of adolescence in relation to the construction of identity. In this story the protagonist, poised between childhood and adulthood, navigates a series of encounters with relatively little awareness of either her childhood past or her potential adult futures. Her choices are risky and her future at the end looks dark.
