### **Singtel Customer Service Feedback:**

Change Management for Sustainability Huong Ha, 2014-06-20 Change management is a challenging and continuous process that requires a particular skill set for both leaders and managers. It is essential for leaders and change agents to understand and address the five most important questions: Why? What? Who? How? When? Inside you will learn the concept of change management, its impact on the company's business performance and sustainability, and the relevant issues associated with it. The author highlights the importance of sustainable development, including economic, environmental, and social elements, and introduces different types of changes, including planned, unplanned, incremental, marginal, transitional, and transformational ones. Various models of planned and unplanned changes are featured, including leaders as change agents, the concept of resistance, reasons, sources, and forms of resistance, definitions of values, attitudes, personalities, and perceptions of individuals, and how these determinants affect individuals' behaviors, attitudes, and responses toward organizational change. Several organizational examples are provided throughout the book to illustrate how high performance organizations grow their business.

*Competition Policy in the ASEAN Countries* G. Sivalingam, 2005 This book is important from the public policy and foreign investment points of view and should be read by all who need to understand the competitive policies in the ASEAN Countries. As the author has rightly pointed out, the narrow capitalistic model to maximize profits, even at the expense of income distribution, has been modified in ASEAN countries to take into account the need for equity and distributive justice. The socio-economic strategy has been essential to promote political stability without which there cannot be economic growth and development. The book argues impressively that competition policy cannot be unfettered but has to be efficiently and compassionately managed to ensure balanced business and steady socioeconomic development. Competitive policies have to follow the best interests of developing economies and not just the pressures and preferences of the capitalistic competitive policies of the highly developed industrial countries that often ignore the different priorities of developing countries.
