Am Terry Clark, 2024-10-10 The number 7 is seen throughout the Bible and every religious text just as I am is a universal story told to mankind in every culture and science. It is a mystery to be revealed the only hope that we can all be one with the cosmos and the laws of nature of what we call God for our salvation before it is too late. It is my greatest love and care and my lifetime work to give this information to help and explain our dilemma. *Ethnomathematics in Action* Milton

Rosa, Cristiane Coppe de Oliveira, 2020-08-10 This book presents a collection of ethnomathematical studies of diverse mathematical practices in Afro-Brazilian indigenous rural and urban communities in Brazil. Ethnomathematics as a research program aims to investigate the interrelationships of local mathematical knowledge sources with broader universal forms of mathematics to understand ideas, procedures and practices found in distinct cultural groups. Based on this approach the studies brought together in this volume show how this research program is applied and practiced in a culturally diverse country such as Brazil where African indigenous and European cultures have generated different forms of mathematical practice. These studies present ethnomathematics in action as a tool to connect the study of mathematics with the students' real life experiences, foster critical thinking and develop a mathematics curriculum which incorporates contributions from different cultural groups to enrich mathematical knowledge. By doing so this volume shows how ethnomathematics can contribute in practice to the development of a decolonial mathematics education. *Ethnomathematics in Action: Mathematical Practices in Brazilian Indigenous Urban and Afro Communities* will be of interest to educators and educational researchers looking for innovative approaches to develop a more inclusive, democratic, critical, multicultural and multiethnic mathematics education.
