

LEAN SIX SIGMA GRADUATE CERTIFICATE

The Certificate in Lean and Six Sigma at the Black Belt skill level is a unique educational program combining two contemporary disciplines into one curriculum.

Online or On Campus

Lean production is a necessary strategy for world leadership in manufacturing and Six Sigma has become a key component of manufacturing success. Acquiring skills in both equips students with comprehensive breadth and depth to streamline processes and improve the bottom line.

Online technology brings this program directly to work sites and homes by delivering regularly scheduled University of Michigan–Ann Arbor courses through distance education. Course notes and materials are distributed through our online learning portal Moodle. Homework and other assignments are submitted either electronically or via email at the discretion of the course instructor.

PROGRAM OBJECTIVES

The program introduces the metrics required in manufacturing plants to accurately measure toward Lean or Six Sigma quality, covers traditional accounting systems to reward effectiveness, and culminates in a job-related project that applies the principles of lean production and Six Sigma.

ADMISSION REQUIREMENTS

- Bachelor of Science degree in Engineering (not engineering technology) from an Accreditation Board for Engineering and Technology (ABET)-accredited institution or the international equivalent with at least two years of college engineering mathematics including probability and statistics.
- A completed Lean Six Sigma Application for Admission to the Certificate Program along with official transcripts from all universities attended.
- International students must take the Test of English as a Foreign Language (TOEFL) or the Michigan English Language Assessment Battery (MELAB).

FACULTY

This program relies upon established courses and faculty from various departments in the College of Engineering. Faculty from various engineering departments may supervise student practicum projects.

PROGRAM REQUIREMENTS

The certificate requires successful completion of the following graduate engineering courses (total of 5 credits), a practicum, and the online Black Belt Six Sigma examination.

- MPE 426 Manufacturing Strategies (2 credits)
- MPE 481 Quality Engineering Principles and Analysis (3 credits)
- A non-credit practicum including an eight-hour seminar examining the integration of Lean and Six Sigma plus the completion of a Six Sigma project reviewed by U-M faculty.
- Successful completion of the online Black Belt Six Sigma examination.

The two courses that are part of the Lean and Six Sigma Graduate Certificate can be applied to the Master of Engineering in Manufacturing if the student is accepted into the graduate program.
