Language of the Skies Sanford F. Borins, 1983-04-01 Through extensive interviews with the key participants Professor Borins reveals the interplay of organizational ideologies and interests and leaders personalities that characterized the conflict He traces its evolution from the early formation of a francophone pressure group through the airline pilots strike in June 1976 in support of the controllers to the agreement between the pilots and controllers unions and the Minister of Transport which the French Canadians saw as a humiliating defeat and to the eventual acknowledgement by the Clark government in August 1979 that bilingual air traffic control was safe Borins discusses the implications of these events for public policy and French English relations and concludes that the federal government's ability in this case to meet francophone demands quite rapidly is cause for optimism about the ability of the federal state to accommodate francophone aspirations

Brian F. Havel, 2009-01-01 *Beyond Open Skies* offers a systematic comparative analysis of the legal and policy dimensions of airline deregulation by federal fiat in the United States and by supranational collaboration in the European Union. The book draws upon a variety of sources including very recent developments in U.S. and EC international aviation law, policy, and diplomacy to propose a genuine multilateral air transport system. It examines the potential of the open skies initiative in the aftermath of the new U.S.-EC air transport agreement to inspire a genuine globalization of the world's air transport industry in such crucial aspects as the following: cabotage, ownership and citizenship requirements, route selection, airline identity, capacity, pricing, regimes, competition, and public aid, regulatory harmonization, labor laws, provisions for charter and/or cargo transportation, fair operation of and access to computer reservations systems, authorization of code sharing arrangements, alliances, and antitrust immunity and dispute resolution.
