children's lives and children in animals' lives. Presenting a new typology of the various kinds of human-animal relationship, this conceptually innovative book constitutes a clear demonstration of the relevance of sociology to the interdisciplinary field of human-animal relations and will appeal to readers across the social sciences with interests in sociology, childhood studies, cultural and media studies, and human-animal interaction. Teacher, 1980. *RECREATING ARTEFACTS AND ANCIENT SKILLS: FROM EXPERIMENT TO INTERPRETATION*. Monica Mărgărit, Adina Boroneanț, 2022-03-01. This volume focuses on the role and means of archaeological experimentation in understanding the processes involved in the manufacture and use of past artifacts. When asking for contributions, we suggested the five stages of an experimental approach as main themes: 1. Selection and acquisition of raw material identical to those present in the archaeological assemblages; 2. Production of replicas following the technological transformation schemes identified by the direct study of archaeological items; 3. Experimental use as indicated by the publications, ethnographic comparisons, or as suggested by the morphology, use wear, evolution of the archaeological items; 4. Microscopical analysis of use wear patterns; 5. Comparison of experimental data with archaeological data in order to validate the existing hypotheses on the way they were manufactured and used by the human communities. A second aim was that the invited authors have various archaeological backgrounds and cover a broad spatial and temporal interval. As a result, this volume comprises 17 studies organized in three sections dictated by the various aspects of experimental archaeology: they represent from the more traditional experimental replication, understanding, and interpretation of artefact functionality, and relatively recent and less trodden directions in experimental archaeology. It also comes to show that experimental archaeology is as well suited for Palaeolithic studies as it is for the Neo-Eneolithic and the Bronze Age. Although most papers refer geographically to Europe, interesting contributions take us to Argentina and Australia. Acest volum se concentrează pe rolul și mijloacele experimentelor arheologice în alegerea proceselor implicate în fabricarea și utilizarea artefactelor din trecut. Am invitat o serie de specialiști să contribuie cu studii care să testeze ipotezele teoretice existente, dar și altele care să aducă abordări inovatoare. Când am solicitat contribuții, am sugerat ca teme principale cele cinci etape ale demersului experimental: 1. Selectarea și achiziționarea de materii prime identice cu cele prezente în ansamblurile arheologice; 2. Realizarea de replici urmând schemele de transformare tehnologică identificate prin studiul direct al ansamblurilor arheologice; 3. Utilizarea experimentală după cum este indicat de publicații, comparații etnografice sau sugerat de evoluția uzurii pe artefactele arheologice; 4. Analiza microscopică a modelelor de uzur; 5. Compararea datelor experimentale cu datele arheologice în vederea validării ipotezelor existente privind fabricarea și utilizarea lor de către comunitățile umane. Un al doilea scop al volumului a fost ca autorii invitați să provină din diferite medii arheologice și să acopere un interval spațial și temporal larg. A rezultat un volum cuprinzând 17 studii organizate în trei secțiuni dictate de diversele aspecte ale arheologiei experimentale: replicarea experimentală la nivel tehnologic, alegerea și interpretarea funcționalității artefactelor și direcțiile relativ recente interdisciplinare în cadrul experimentului arheologic. De asemenea, volumul ne a arătat că arheologia

experimental este la fel de potrivit pentru studiile paleolitice ca i pentru neo eneolitic i epoca bronzului De i majoritatea lucrurilor se refer geografic la Europa contribu ii interesante vin din Argentina sau Australia
