Teaching to Learn Kenneth George Tobin, 2006 A recurrent trope in education is the gap that exists between theory taught at the university and praxis what teachers do in classrooms How might one bridge this inevitable gap if new teachers are asked to learn to talk about teaching rather than to teach In response to this challenging question the two authors of this book have developed coteaching and cogenerative dialoguing two forms of praxis that allow very different stakeholders to teach and subsequently to reflect together about their teaching The authors have developed these forms of praxis not by theorizing and then implementing them but by working at the elbow of new and experienced teachers students supervisors and department heads Coteaching which occurs when two or more teachers teach together supports learning to teach while improving student achievement Cogenerative dialogues are conversations among all those who have been present in a lesson they ensure that what was learned while coteaching is beneficial for all coteachers and learners Tobin and Roth describe the many ways coteaching and cogenerative dialogues are used to improve learning environments dramatically improving teaching and learning across cultural borders defined by race ethnicity gender and language Teaching to Learn is written for science educators and teacher educators along the professional continuum new and practicing teachers graduate students professors researchers curriculum developers evaluation consultants science supervisors school administrators and policy makers Thick ethnographic descriptions and specific suggestions provide readers access to resources to get started and continue their journeys along a variety of professional trajectories *Science Instruction in the Middle and Secondary Schools* Alfred T.
