The First Sourcebook on Asian Research in Mathematics Education - 2 Volumes Bharath Sriraman, Jinfa Cai, Kyeonghwa Lee, Lianghuo Fan, Yoshinori Shimizu, Chap Sam Lim, K. Subramaniam, 2015-08-01 Mathematics and Science education have both grown in fertile directions in different geographic regions Yet the mainstream discourse in international handbooks does not lend voice to developments in cognition curriculum teacher development assessment policy and implementation of mathematics and science in many countries Paradoxically in spite of advances in information technology and the flat earth syndrome old distinctions and biases between different groups of researcher's persist In addition limited accessibility to conferences and journals also contribute to this problem The International Sourcebooks in Mathematics and Science Education focus on under represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education The First Sourcebook on Asian Research in Mathematics Education China Korea Singapore Japan Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world The book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing

research agendas and informed practices in Europe North America and other countries in addition to serving as a platform to showcase existing research that has shaped teacher education curricula and policy in these Asian countries The book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside Asia and complement the Nordic and NCTM perspectives

Pisa Ranking: Issues And Effects In Singapore, East Asia And The World Kay Cheng Soh, 2017-03-14 The OECD's Programme for International Student Assessment PISA is gaining increasing attention among education authorities of the world The number of participating economies almost doubled in the past one and a half decades increasing from 43 in 2000 when it first started to 74 in 2015 PISA assesses the performance in Reading Mathematics and Science of 15 year olds with different emphases rotating among the three subjects in different exercises The attention of the participating economies has been focused almost exclusively on the ranking results which are used to evaluate the standings and progress of their education systems although PISA does cover many background conditions which might have influenced the performance Interestingly East Asian economies have been consistently in the leading positions and Finland has been frequently cited as a model for the Western economies and even the world to emulate This monograph contains many secondary analyses of PISA data It presents results of comparisons of Singapore East Asian economies and the world It also points up some influencing factors such as time in and after school test language effect administrative styles and school environment Statistical and measurement issues are also raised and demonstrated Moreover cultural differences are evoked as a plausible explanation of the differences observed between the East and the West This monograph using mainly simple and layman language equips educational administrators and policy makers with in depth insights into some of the intricacies inherent in the PISA data for a more appropriate understanding It is readily appreciated that such an understanding is needed to prevent misinterpretation and avoid unsound policy or wasteful action
