Mary Burnham,Carol Hurd,1928      *Essays on Giordano Bruno* Hilary Gatti,2010-10-18 This book gathers wide ranging  
essays on the Italian Renaissance philosopher and cosmologist Giordano Bruno by one of the world s leading authorities on  
his work and life Many of these essays were originally written in Italian and appear here in English for the first time Bruno  
1548 1600 is principally famous as a proponent of heliocentrism the infinity of the universe and the plurality of worlds But his  
work spanned the sciences and humanities sometimes touching the borders of the occult and Hilary Gatti s essays richly  
reflect this diversity The book is divided into sections that address three broad subjects the relationship between Bruno and  
the new science the history of his reception in English culture and the principal characteristics of his natural philosophy A  
final essay examines why this advocate of a tranquil universal philosophy ended up being burned at the stake as a heretic by  
the Roman Inquisition While the essays take many different approaches they are united by a number of assumptions that  
although well versed in magic Bruno cannot be defined primarily as a Renaissance Magus that his aim was to articulate a  
new philosophy of nature and that his thought while based on ancient and medieval sources represented a radical rupture  
with the philosophical schools of the past helping forge a path toward a new modernity
