

Sir Isaac Newton

Sir Isaac Newton was an important scientist and mathematician who is famous for his work on **gravity** and the three laws of motion.

Early Life and Education

Isaac was born on Christmas Day (25th December) 1642 in the village of Woolsthorpe, Lincolnshire. He spent most of his childhood living with his grandmother before being sent to **boarding school**.

Isaac began studying at the University of Cambridge in 1661 where he learnt about the famous Greek thinkers, Aristotle and Plato. However, Isaac soon became interested in the new ideas about science which were becoming popular at the time. Many people were starting to question the old belief that the Earth was the centre of the universe and Isaac was keen to explore new ways of understanding how nature worked.

Did You Know...?

Isaac returned to Lincolnshire for a short while to help his mother to run the family farm. However, he soon found that he was not suited to farm life so he went back to boarding school to continue his education.

Scientific Discoveries

After completing his university studies, Isaac carried out lots of experiments and made some important discoveries. He found that when white light passes through a **prism** it separates into a band of colours. This led him to discover that white light is made up of a mixture of colours.

Many people believe that Isaac discovered gravity while sitting under a tree on his family's farm. It is said that an apple fell from a tree and landed on Isaac's head. He then started to wonder why the apple fell to the ground rather than floating upwards. Isaac also realised that it was gravity that kept the Moon in **orbit** around the Earth.

Did You Know...?

Isaac was forced to move back to Lincolnshire because of an outbreak of the **plague** in Cambridge. However, it is thought that it was at home on the family farm where he made some of his most important discoveries.

Judaism in the Theology of Sir Isaac Newton M. Goldish, 2013-04-17 This book is based on my doctoral dissertation from the Hebrew University of Jerusalem 1996 of the same title As a master's student working on an entirely different project I was well aware that many of Newton's theological manuscripts were located in our own Jewish National and University Library but I was under the mistaken assumption that scores of highly qualified scholars must be assiduously scouring them and publishing their results It never occurred to me to look at them at all until having finished my master's I spoke to Professor David Katz at Tel Aviv University about an idea I had for doctoral research Professor Katz informed me that the project I had suggested was one which he himself had just finished but that I might be interested in working on the famous Newton manuscripts in the context of a project being organized by him Richard Popkin James Force and the late Betty Jo Teeter Dobbs to study and publish Newton's theological material I asked him whether he was not sending me into the shark infested waters of highly competitive scholarship and learned that in fact there were only a handful of scholars in the world who actively studied and published on Newton's theology At the time the group consisted mainly of Popkin Force Dobbs Frank Manuel Kenneth Knoespel and David Castillejo
