

SYSTEMS OF LINEAR EQUATIONS: WORD PROBLEMS

Write a system of equations for each problem. Then solve the system of equations using any method. If you choose to solve the system of equations by graphing, you will need a sheet of graph paper to show your work.

1. Julian is buying donuts to bring to his aunt's house for breakfast. He wants to buy one donut for each of the 5 people attending, which includes himself. He buys some blueberry cake donuts, which cost \$3 each, and some chocolate-glazed donuts, which cost \$2 each. If Julian spends \$20 before tax, how many of each type of donut did he buy?
2. Leila wants to sell her homemade candles at the Linwood Street Craft Fair. She decides to sell her candles for \$12 apiece. The materials for one candle cost Leila \$3. If she also pays \$40 to rent the booth for the day, how many candles must Leila sell to cover all of her expenses? How much will her sales and expenses be at that point?
3. The drama club at Hawthorne Middle School is selling tickets to their spring musical. Student tickets cost \$10 and adult tickets cost \$15. Last week, they sold 120 tickets for the Sunday matinee show. If those ticket sales totaled to \$1,400, how many adult tickets were sold? How many student tickets were sold?
4. An artist sells his paintings at a gallery. He charges a set price for each small painting and each large painting he sells. Last month, the artist sold 8 small paintings and 5 large paintings and earned \$870 in all. This month, he sold 12 small paintings and 10 large paintings and earned \$950 in all. How much does the artist charge for a small painting? How much does he charge for a large painting?

Bonem,2011-04-18 This book provides methods to train process operators to solve challenging problems The book is split into two parts The first part consists of two parts first developing a daily monitoring system and second providing a structured 5 step problem solving approach that combines cause and effect problem solving thinking with the formulation of theoretically correct hypotheses The 5 step approach emphasizes the classical problem solving approach defining the sequence of events with the addition of the steps of formulating a theoretically correct working hypothesis providing a means to test the hypothesis and providing a foolproof means to eliminate the problem The initial part of the book focuses on defining the problem that must be solved and obtaining the location time and quantity based specifications of the problem This part of the book also presents techniques to find and define problems at an early point before they progress to the critical level The second part of the book deals with the utilization of fundamental chemical engineering skills to develop a technically correct working hypothesis that is the key to successful problem solving The primary emphasis is on simple pragmatic calculation techniques that are theoretically correct It is believed that any operator can perform these calculations if he is provided the correct prototype Throughout the book the theory behind each pragmatic calculation technique is explained in understandable terms prior to presenting the author s approach These techniques have been developed by the author in 50 years of industrial experience The book includes many sample problems and examples of real world problem

solving Using these techniques theoretically correct working hypotheses can be developed in an expedient fashion
