## Introduction

Situational Crime Prevention (SCP) is a perspective in criminology that examines situational factors in criminal acts and implements specific interventions aimed at disrupting said factors and preventing crime. It is summarized in the article "Situational Crime Prevention" by J. Freilich and G. Newman. This paper will reflect on the description provided in the document and suggest some materials that praise or critique the perspective's application.

## Criticisms and Praise

The rationality principle, stating that potential criminals perform what amounts to a cost-benefit analysis, is a fundamental premise of SCP. However, there have always been doubts as to whether one can always be rational, leading to the notion of bounded rationality (Freilich & Newman, 2017). Sidebottom and Tilley (2017) describe a situation where an offender's "aggression is 'expressive' rather than 'instrumental'" (p. 79).

Coyne and Eck (2015) further point out that during this supposed cost-benefit analysis, one may not consider the deterrents and "operate on faulty heuristics" (p. 24). This, despite the reduction of provocations' inclusion in SCP's 25 methods, contradicts the fundamental notion that people commit crimes to reach some measurable goal.

SCP focuses on deterring crime by increasing the risk and effort in committing a crime. However, research, as well as experience, shows that this is not always an effective tactic. Active resistance by the victim, for instance, should seem like an obvious way to deter an offender. However, in some situations, like child sexual abuse, fighting back and calling for help only succeeded in "warding off an offense in 11.8% and 4% of cases" (Jacques & Bonomo, 2016, p. 11). The same offender-based study shows that removing the excuse by simply refusing one's advances was the most successful defense tactic by the victim. These findings suggest that different interventions' effectiveness might vary on a crime-by-crime basis, necessitating further research.
