you're like most content area educators you're feeling a bit overwhelmed at the thought of addressing all the new standards or you might just need a little extra help. In this hands-on resource, Common Core literacy expert Katherine McKnight offers secondary teachers a clear understanding of what literacy looks like in math, science, and technical subjects. McKnight gives educators proven teaching techniques that help develop literacy skills in students. She also offers a wealth of practical strategies and ready-to-use activities that content area teachers can integrate seamlessly. Included are:

- Ideas for implementing the literacy requirements of the Common Core across content areas.
- A selection of activities that support literacy skills and build content knowledge in math, science, and technology classrooms.
- An easy-to-use Difficulty Dial that indicates the complexity of each activity.
- Robust student samples that bring the activities to life across a variety of grade levels and subjects.

Common Core Literacy for Math, Science, and Technical Subjects is designed for practicality. With bonus web downloads, a literacy resource guide, and countless ideas for deepening content knowledge, this book provides excellent support for rigorous Common Core implementation.
