He, Hao Zhang, Alexander Zahar, 2020-05-31 In *Climate Change Law in China in Global Context* seven climate change law scholars explain how the country's legal system is gradually being mobilized to support the reduction of greenhouse gas emissions in China and achieve adaptation to climate change. There has been little English scholarship on the legal regime for climate change in China. This volume addresses this gap in the literature and focuses on recent attempts by the country to build defences against the impacts of climate change and to meet the country's international obligations on mitigation. The authors are not only interested in China's laws on paper rather the book explains how these laws are implemented and integrated in practice and sheds light on China's current laws in preparation the changing standing of law relative to policy and the further reforms that will be necessary in response to the 2015 Paris Agreement on Climate Change. This comprehensive and critical account of the Chinese legal system's response to the pressures of climate change will be an important resource for scholars of international law, environmental law and Chinese law.

Understanding Ponzi Schemes Mervyn K. Lewis, 2015-11-27 A Ponzi scheme is one of the simplest albeit effective financial frauds to engineer and new schemes keep coming forward. Despite this however people continue to invest in them. How are we to account for the seemingly never ending lure of such schemes? In providing answers to this central question this concise and well researched book examines how Ponzi schemes operate how they differ from pyramid schemes Ponzi finance and other financial arrangements. The author questions whether the victims have only themselves to blame why fraudsters think that they can avoid detection and what important insights behavioural finance theory and psychology can add. Particular attention is paid to the reasons behind the failure of financial regulation and the types of regulatory changes needed to protect investors and avoid repetitions. The analysis is informed by case studies of 11 Ponzi schemes in the US UK Australia and New Zealand. Finance and business academics interested in the operation of Ponzi schemes and how they differ from pyramid schemes will find this book invaluable as will students of economics finance behavioural decision making and psychology. Lawyers psychologists regulatory agencies and financial institutions will also benefit considerably from the analysis.
