Social Innovations in Urban Sanitation in India Shubhagato Dasgupta, Kaustuv Kanti Bandyopadhyay, Anju Dwivedi, Sumona Das Gupta, Ms Bharti, 2023-04-25 This book discusses effective social innovation strategies facilitated by civil society organisations CSOs to tackle India's significant urban sanitation challenge. It presents the contours of an ecosystem that includes citizen participation and strengthening community managed systems for improved sanitation and public health. The book analyses case studies of effective sanitation programmes as well as experiments with innovative ideas in different regional contexts by CSOs to meet the contextual needs of the community and to ensure access to safe sanitation especially among the urban poor. It highlights the challenges and the need for active participation of communities for change in behaviour, increasing institutional capacities of municipalities for standardising and scaling up strategies which work. The authors highlight the need for designing low cost solutions, organising informal sanitation workers serving marginalised communities and building effective alliances between communities and institutions to influence public policy. Rich in empirical data, this book will be useful for scholars and researchers of urban studies, public policy, governance, political science, development studies and sociology as well as for CSOs and non governmental organisations NGOs working on urban sanitation, urban planning and public policy.

Caste and nature Mukul Sharma, 2017-09-25 Rarely do Indian environmental discourses examine nature through the lens of caste. Whereas nature is considered as universal and inherent, caste is understood as a constructed historical and social entity. Mukul Sharma shows how caste and nature are intimately connected. He compares Dalit meanings of environment to ideas and practices of neo Brahmanism and certain mainstreams of environmental thought. Showing how Dalit experiences of environment are ridden with metaphors of pollution, impurity and dirt, the author is able to bring forth new dimensions on both environment and Dalits without valorizing the latter's standpoint. Rather than looking for a coherent understanding of their ecology, the book explores the diverse and rich intellectual resources of Dalits such as movements, songs, myths, memories and metaphors around nature. These reveal their quest to define themselves in caste ridden nature and building a form of environmentalism free from the burdens of caste. The Dalits also pose a critical challenge to Indian environmentalism which has until now marginalized such linkages between caste and nature.

The Sanitation Triangle Taro Yamauchi, Seiji Nakao, Hidenori Harada, 2022-02-28 This open access book deals with global sanitation where SDG 6.2 sets a target of enabling access to sanitation services for all but has not yet been achieved in low and middle income countries. The transition from the United Nations MDGs to the SDGs requires more consideration based on the socio cultural aspects of global sanitation. In other words, equitable sanitation for those in vulnerable situations could be based on socio cultural contexts. Sanitation is a system that comprises not only a latrine but also the works for the treatment and disposal of human waste. Sanitation systems do not function by themselves but have significance only through social management. The process of decision making also largely depends on socio cultural

conditions and the importance of sanitation needs to be socially acknowledged The health benefits of sanitation improvement among the significant contributions of sanitation also need to be considered in the socio cultural milieu Further the social culture itself is affected and potentially even created by sanitation In this context more progress on the improvement of sanitation requires a more holistic approach across disciplines In this book we present the concept of the Sanitation Triangle which considers the interconnections of health materials and socio culture in sanitation as a holistic approach and the case studies based on the Sanitation Triangle by diverse disciplines such as Cultural Anthropology Development Studies Health Sciences Engineering and Science Communication By the deep theoretical examinations and inter dialogues between the different disciplines this book explores the potentialities of inter disciplinary studies on global sanitation

Haiti and Saudi Arabia *A New India?* Anthony P. D'Costa,2010-12 This volume critically examines the notion of a new India by acknowledging that India is changing remarkably and by indicating that in the overzealous enthusiasm about the new India there is collective amnesia about the other older India The book argues that the increasing consolidation of capitalist markets of commodity production and consumption has unleashed not only economic growth and social change but has also introduced new contradictions associated with market dynamics in the material and social as well as intellectual spheres *Issues and Challenges of Inclusive Development* R. Revathi,2020-06-18 This book explores inclusive development in the Indian context not only within each of the country s major economic and social sectors but also across countries in the particular context of globalization In the emerging scenario of most expanding economies including India this topic remains particularly significant The book s sixteen chapters are divided into eight sections that address burning issues related to inclusive development historical setting and policy context current issues and future challenges inclusiveness in the agricultural sector inclusiveness in the industrial sector inclusiveness in the health sector inclusiveness and poverty inclusiveness in the social context and inclusiveness in the globalization context The book highlights several positive developments displayed by the Indian economy in recent years including the current growth rate of about 7 percent which is among the highest rates around the globe At the same time it draws attention to the fact that while there is every reason to feel proud of these achievements we cannot ignore the strains and brewing distress especially in rural areas or the concerns in environmental and social sectors including health and education relating to sociological divisions and disturbances water and air pollution and ecosystem and biodiversity losses Important and relevant from both academic and policy perspectives the book includes essays from some of the most eminent economists and social scientists in the South Asian region providing vital takeaways for researchers and NGOs as well as corporate sector and government decision makers *Law and Democracy in Contemporary India* Tatsuya Yamamoto,Tomoaki Ueda,2018-11-27 This book analyses legal orders actors and democracy in contemporary India with a particular focus on the everyday contexts and dynamics of human rights citizenship and socio economic rights and laws The contributions explore both institutionalization from above where the judiciary and legislative body aim to govern people and institutionalization from below where the governed attempt to expand their substantive rights embedded within their everyday lives This analysis identifies contact zones between the two directions which act as spaces for democratic participation and negotiation Such a perspective should be useful to both those who are interested in Indian politics and anthropologists and sociologists working on dynamics of laws and rights *Social Issues of India , Labour File ,2005 Outlook ,2007 Resource Handbook for Ending Manual Scavenging* Harsh Mander,2014 **Manual Scavenging :Shortcomings and Challenges** Aarti Singh,2017-03-28
