Reconsidering Localism Rtpi Library Series:

Reconsidering Localism Simin Davoudi, Ali Madanipour, 2015-01-09 Localism has been deployed in recent debates over planning law as an anodyne grassroots way to shape communities into sustainable human scale neighborhoods But local is a moving category with contradictory nuanced dimensions *Reconsidering Localism* brings together new scholarship from leading academics in Europe and North America to develop a theoretically grounded critique and definition of the new localism and how it has come to shape urban governance and urban planning Moving beyond the UK this book examines localism and similar shifts in planning policy throughout Europe and features essays on localism and place making sustainability social cohesion and citizen participation in community institutions It explores how debates over localism and citizen control play out at the neighborhood institutional and city level and has come to effect the urban landscape throughout Europe *Reconsidering Localism* is a current vital addition to planning scholarship *The Routledge Handbook of Planning Theory* Michael Gunder, Ali Madanipour, Vanessa Watson, 2017-08-23 *The Routledge Handbook of Planning Theory* presents key contemporary themes in planning theory through the views of some of the most innovative thinkers in planning They introduce and explore their own specialized areas of planning theory to conceptualize their contemporary positions and to speculate how these positions are likely to evolve and change as new challenges emerge In a changing and often unpredictable globalized world planning theory is core to understanding how planning and its practices both function and evolve As illustrated in this book planning and its many roles have changed profoundly over the recent decades so have the theories both critical and explanatory about its practices values and knowledges In the context of these changes and to contribute to the development of planning research this handbook identifies and introduces the cutting edge and the new emerging trajectories of contemporary planning theory The aim is to provide the reader with key insights into not just contemporary planning thought but potential future directions of both planning theory and planning as a whole This book is written for an international readership and includes planning theories that address or have emerged from both the global North and parts of the world beyond *Insurgencies and Revolutions* Haripriya Rangan, Mee Kam NG, Libby Porter, Jacquelyn Chase, 2016-10-26 Over the past six or more decades John Friedmann has been an insurgent force in the field of urban and regional planning transforming it from its traditional state centered concern for establishing social and spatial order into a radical domain of collaborative action between state and civil society for creating the good society in the present and future By opening it up to theoretical engagement with a wide range of disciplines Friedmann's contributions have revolutionised planning as a transdisciplinary space of critical thinking social learning and reflective practice *Insurgencies and Revolutions* brings together former students close research associates and colleagues of John Friedmann to reflect on his contributions to planning theory and practice The volume is organized around five broad themes where Friedmann's contributions have risen to challenge established paradigms and generated the space for revolutionary thinking

and action in urban and regional planning Theorising hope Economic development and regionalism World cities and the Good city Social learning empowered communities and citizenship and Chinese cities The essays by the authors reflect their engagement with his ideas and the new directions in which they have taken these in their work in planning theory and practice

Public Norms and Aspirations Willem Salet, 2018-03-05 The aspirations of individuals organizations and states and their perceptions of problems and possible solutions circulate fast in this instantaneous society Yet the deliberation of the underlying public norms seems to escape the attention of the public Institutions enable people to have reliable expectations of one another even when they are unsure of each other's aspirations and purposes Public norms enable people to act under conditions of increasing uncertainty To fulfill this role in society institutions need enhancement maintenance and innovation Public Norms and Aspirations aims to improve the methodology of planning research and practice by exploring the co evolution of institutional innovation and the philosophy of pragmatism in processes of action As most attention in planning research and planning practices goes to the pragmatic approaches of aspirations and problem solving the field is awaiting an upgrade of institutional perspectives This book aims to explore the interaction of institutional and pragmatic thought and to suggest how these two approaches might be integrated and applied in successful planning research Searching this combination at the interface of sociology planning and law Salet opens a unique niche in the existing planning literature

Planning for Small Town Change Neil Powe, Trevor Hart, 2017-02-17 Change is inevitable in all communities they both grow and decline Planning is a means by which we have sought to manage this change It has not always succeeded in providing the types of settlements and environments which many residents and others want either because it is operating with the wrong policies or because it is failing to ensure that the right policies are effectively implemented These failings have opened planning to criticism by a dominant neoliberal orthodoxy which shapes an increasingly difficult environment in which planning has to operate Planning for Small Town Change builds on an underexploited selection of international research and the authors English case studies to consider the efficacy of planning for change Drawing on insightful small town experiences three themes emerge understanding and conceptualising change appreciating the potential within place and the mechanisms for planning and delivery The research draws on many examples of how key actors have made a significant difference to specific places and provides important insights into how the planning process can be better matched to the long term and complex challenges faced Whilst small town experiences are often neglected they are found to be particularly insightful in understanding the potential roles of local communities and the importance of place quality when planning for change

Regent Park Redux Laura Johnson, Robert Johnson, 2017-05-12 Regent Park Redux evaluates one of the biggest experiments in public housing redevelopment from the tenant perspective Built in the 1940s Toronto's Regent Park has experienced common large scale public housing problems Instead of simply tearing down old buildings and scattering inhabitants the city's housing authority came up with a plan for radical transformation In partnership with a

private developer the Toronto Community Housing Corporation organized a twenty year billion dollar makeover The reconstituted neighbourhood one of the most diverse in the world will offer a new mix of amenities and social services intended to reknit the urban fabric Regent Park Redux based on a ten year study of 52 households as they moved through stages of displacement and resettlement examines the dreams and hopes residents have for their community and their future Urban planners and designers across the world in cities facing some of the same challenges as Toronto will want to pay attention to this story

Immerse yourself in heartwarming tales of love and emotion with Explore Love with is touching creation, **Reconsidering Localism Rtpi Library Series** .
