*Enabling Real-time Analytics on IBM z Systems Platform* Lydia Parziale,Oliver Benke,Willie Favero,Ravi Kumar,Steven LaFalce,Cedrine Madera,Sebastian Muszytowski,IBM Redbooks,2016-08-08 Regarding online transaction processing OLTP workloads IBM z Systems™ platform with IBM DB2 data sharing Workload Manager WLM geoplex and other high end features is the widely acknowledged leader Most customers now integrate business analytics with OLTP by running for example scoring functions from transactional context for real time analytics or by applying machine learning algorithms on

enterprise data that is kept on the mainframe As a result IBM adds investment so clients can keep the complete lifecycle for data analysis modeling and scoring on z Systems control in a cost efficient way keeping the qualities of services in availability security reliability that z Systems solutions offer Because of the changed architecture and tighter integration IBM has shown in a customer proof of concept that a particular client was able to achieve an orders of magnitude improvement in performance allowing that client s data scientist to investigate the data in a more interactive process Open technologies such as Predictive Model Markup Language PMML can help customers update single components instead of being forced to replace everything at once As a result you have the possibility to combine your preferred tool for model generation such as SAS Enterprise Miner or IBM SPSS Modeler with a different technology for model scoring such as Zementis a company focused on PMML scoring IBM SPSS Modeler is a leading data mining workbench that can apply various algorithms in data preparation cleansing statistics visualization machine learning and predictive analytics It has over 20 years of experience and continued development and is integrated with z Systems With IBM DB2 Analytics Accelerator 5.1 and SPSS Modeler 17.1 the possibility exists to do the complete predictive model creation including data transformation within DB2 Analytics Accelerator So instead of moving the data to a distributed environment algorithms can be pushed to the data using cost efficient DB2 Accelerator for the required resource intensive operations This IBM Redbooks publication explains the overall z Systems architecture how the components can be installed and customized how the new IBM DB2 Analytics Accelerator loader can help efficient data loading for z Systems data and external data how in database transformation in database modeling and in transactional real time scoring can be used and what other related technologies are available This book is intended for technical specialists and architects and data scientists who want to use the technology on the z Systems platform Most of the technologies described in this book require IBM DB2 for z OS For acceleration of the data investigation data transformation and data modeling process DB2 Analytics Accelerator is required Most value can be achieved if most of the data already resides on z Systems platforms although adding external data like from social sources poses no problem at all

**Big Data Analytics with SAS** David Pope, 2017-11-23 Leverage the capabilities of SAS to process and analyze Big Data About This Book Combine SAS with platforms such as Hadoop SAP HANA and Cloud Foundry based platforms for efficient Big Data analytics Learn how to use the web browser based SAS Studio and iPython Jupyter Notebook interfaces with SAS Practical real world examples on predictive modeling forecasting optimizing and reporting your Big Data analysis with SAS Who This Book Is For SAS professionals and data analysts who wish to perform analytics on Big Data using SAS to gain actionable insights will find this book to be very useful If you are a data science professional looking to perform large scale analytics with SAS this book will also help you A basic understanding of SAS will be helpful but is not mandatory What You Will Learn Configure a free version of SAS in order do hands on exercises dealing with data management analysis and reporting Understand the basic concepts of the SAS language which consists of the data step for data preparation and

procedures or PROCs for analysis Make use of the web browser based SAS Studio and iPython Jupyter Notebook interfaces for coding in the SAS DS2 and FedSQL programming languages Understand how the DS2 programming language plays an important role in Big Data preparation and analysis using SAS Integrate and work efficiently with Big Data platforms like Hadoop SAP HANA and cloud foundry based systems In Detail SAS has been recognized by Money Magazine and Payscale as one of the top business skills to learn in order to advance one s career Through innovative data management analytics and business intelligence software and services SAS helps customers solve their business problems by allowing them to make better decisions faster This book introduces the reader to the SAS and how they can use SAS to perform efficient analysis on any size data including Big Data The reader will learn how to prepare data for analysis perform predictive forecasting and optimization analysis and then deploy or report on the results of these analyses While performing the coding examples within this book the reader will learn how to use the web browser based SAS Studio and iPython Jupyter Notebook interfaces for working with SAS Finally the reader will learn how SAS s architecture is engineered and designed to scale up and or out and be combined with the open source offerings such as Hadoop Python and R By the end of this book you will be able to clearly understand how you can efficiently analyze Big Data using SAS Style and approach The book starts off by introducing the reader to SAS and the SAS programming language which provides data management analytical and reporting capabilities Most chapters include hands on examples which highlights how SAS provides The Power to Know The reader will learn that if they are looking to perform large scale data analysis that SAS provides an open platform engineered and designed to scale both up and out which allows the power of SAS to combine with open source offerings such as Hadoop Python and R
