

Netview

Purpose of this tool

Netview can be used for online monitoring of SIPROTEC devices (at least module-firmware 4.00 needed for Ethernet module, which was released in 06/2007). Also other devices like switches or PCs can be monitored (automatically by the "ping"-command), if they are imported in the SCD – file with their ICD – file description. Comprehensive monitoring values are only available for SIPROTEC – devices.

Netview requires the exported SCD-file of a DIGSI-project. The SCD-file contains the IP-addresses of all participating devices, if they are imported into the System Configurator of DIGSI. The Ethernet modules in the SIPROTEC devices support the SNMP-protocol, which provides the EN100 module information to Netview. Netview shows all necessary communication parameters with Web – pages, which are created and updated automatically when the tool is in operation. So you have an online view to your network. Netview supports you during build up your station bus and troubleshooting in case of communication failures as well.

How to use Netview

1.) Start Netview

1.1) After extracting the self-extracting Zip-file "NetviewSetup.exe" to any folder on your hard disk (e.g. D:\Netview), you need to create a shortcut for the application. Therefore, right mouse-click on an empty location of your desktop and choose from the menu: New→Shortcut:

Now, click the "Browse" Button and choose from the destination folder you extracted the "NetviewSetup.exe" archive to, the file "NetviewIEC61850.exe" and click "OK", then click "Next":

The Informatics Handbook S.A. Fist, 2012-12-06 This is not a dictionary and nor is it an encyclopedia It is a reference and compendium of useful information about the converging worlds of computers communications telecommunications and broadcasting You could refer to it as a guide for the Information Super Highway but this would be pretentious It aims to cover most of the more important terms and concepts in the developing discipline of Informatics which in my definition includes the major converging technologies and the associated social and cultural issues Unlike a dictionary this handbook makes no attempt to be prescriptive in its definitions Many of the words we use today in computing and communications only vaguely reflect their originations And with such rapid change older terms are often taken twisted inverted and mangled to the point where any attempt by me to lay down laws of meaning would be meaningless The information here is descriptive I am concerned with usage only This book therefore contains keywords and explanations which have been culled from the current literature from technical magazines newspapers the Internet forums etc This is the living language as it is being used today not a historical artifact of 1950s computer science
