Hollywood or History? Sarah J. Kaka, 2022-01-01 The rationale for the present text Hollywood or History An Inquiry Based Strategy for Using Film to Teach About Inequality and Inequity Throughout History stems from two main things First and foremost is the fact that the reviews of the first two volumes in the Hollywood or History series have been overwhelmingly positive especially as it pertains to the application of the strategy for practitioners Classroom utility and teacher practice have continued to be the primary objectives in developing the Hollywood or History strategy The second thing is that this most recent volume in the series takes it in a new direction rather than focusing on eras in history it focuses on the themes of inequity and inequality throughout history and how teachers can utilize the Hollywood or History strategy to tackle some of the more complicated content throughout history that many teachers tend to shy away from There is a firm belief that students connection to film along with teachers ability to use film in an effective manner will help alleviate some of the challenges of teaching challenging topics such as inequity and inequality in terms of gender race socioeconomic status and so much more The book provides 30 secondary lesson plans grades 6 12 that address nine different topics centered around inequity and inequality throughout history many of which connect students to the world we are living in today The intended audience for the book are teachers who teach social studies at the 6th 12th grade level both in the United States and other countries An additional audience will be college and university social studies history methods professors in the United States and worldwide *Resources in Education*, 1971-07 CATV and Video Applications of Fiber Optics IGIC, Inc. and informed Both men called Lancaster County Pennsylvania their home and both were bachelors During the 1850s James Buchanan tried to keep the Democratic Party alive as the slavery debate divided his peers and the political system Thaddeus Stevens meanwhile as Whig turned Republican invested in the federal government to encourage economic development and social reform especially antislavery and Republican Reconstruction Considering Buchanan and Stevens s divergent lives alongside their political and social worlds reveals the dynamics and directions of American politics especially northern interests and identities While focusing on these individuals the contributors also explore the roles of parties and patronage in informing political loyalties and behavior They further track personal connections across lines of gender and geography and underline the importance of details like who regularly dined and conversed with whom the complex social milieu of Washington the role of rumor in determining political allegiances and the ways personality and failing relationships mattered in a hothouse of national politics fueled by slavery and expansion The essays in *The Worlds of James Buchanan and Thaddeus Stevens* collectively invite further consideration of how parties personality place and private lives influenced the political interests and actions of an age affected by race religion region civil war and reconstruction

Rome at War Nathan Rosenstein, 2005-12-15 Historians have long asserted that during and after the Hannibalic War the Roman Republic s need to conscript men for long term military service helped bring about the demise of Italy s small farms and that the misery of impoverished citizens then became fuel for the social and political conflagrations of the late republic Nathan Rosenstein challenges this claim showing how Rome reconciled the needs of war and agriculture throughout the middle republic The key Rosenstein argues lies in recognizing the critical role of family formation By analyzing models of families needs for agricultural labor over their life cycles he shows that families often had a surplus of manpower to meet the demands of military conscription Did then Roman imperialism play any role in the social crisis of the later second century B C Rosenstein argues that Roman warfare had critical demographic consequences that have gone unrecognized by previous historians heavy military mortality paradoxically helped sustain a dramatic increase in the birthrate ultimately leading to overpopulation and landlessness
