*Water Wave Mechanics for Engineers and Scientists* Robert George Dean, Robert A. Dalrymple, 1984      **Water Wave Mechanics For Engineers And Scientists** Robert G Dean, Robert A Dalrymple, 1991-01-23 This book is intended as an introduction to classical water wave theory for the college senior or first year graduate student The material is self contained almost all mathematical and engineering concepts are presented or derived in the text thus making the book accessible to practicing engineers as well The book commences with a review of fluid mechanics and basic vector concepts The formulation and solution of the governing boundary value problem for small amplitude waves are developed and the kinematic and pressure fields for short and long waves are explored The transformation of waves due to variations in depth and their interactions with structures are derived Wavemaker theories and the statistics of ocean waves are reviewed The application of the water particle motions and pressure fields are applied to the calculation of wave forces on small and large objects Extension of the linear theory results to several nonlinear wave properties is presented Each chapter concludes with a set of homework problems exercising and sometimes extending the material presented in the chapter An appendix provides a description of nine experiments which can be performed with little additional equipment in most wave tank facilities

**Automated Coastal Engineering System** David A. Leenknecht, Andre Z. Szuwalski, Ann R. Sherlock, Andre Szuwalski, 1992      *Ocean Wave Mechanics* V. Sundar, 2017-02-13 This is a textbook aimed at graduate students and offshore engineering practitioners that covers basic fluid mechanics and the deterministic and statistical descriptions of infinitesimal and finite amplitude water waves It reviews the theory of wave loading on structures and closes with a chapter on the potential of ocean wave energy and devices for extracting it Since the 1980s there has been tremendous progress in numerical and physical modelling of coastal and offshore structures in waves This calls for a clear understanding of the phenomena of wave generation propagation deformation and its effects on marine structures This book will help the reader to understand the many results and descriptions found in journals reports and research papers It is self contained and encompasses the fundamentals of the subject with sufficient description and illustrations      **Users Guide to Physical Modelling and Experimentation** Lynne E. Frostick, Stuart J. McLelland, T.G. Mercer, 2011-05-20 A Users Guide to Hydraulic Modelling and Experimentation provides a systematic comprehensive summary of the progress made through HYDRALAB III The book combines the expertise of many of the leading hydraulic experimentalists in Europe and identifies current best practice for carrying out state of the art modern laboratory investigations In addition it gives an inventory and reviews recent advances in instrumentation and equipment that drive present and new developments in the subject The Guide concentrates on four core areas waves breakwaters sediments and the relatively new but rapidly developing cross disciplinary area of hydrodynamics ecology Progress made through the CoMIBBS component of HYDRALAB III provides the material for a chapter focussed on guidance principles and practice for composite modelling There is detailed consideration of scaling and

the degree of relevance of laboratory physical modelling approaches for specific contexts included in each of the individual chapters The Guide includes outputs from the workshops and several of the innovative transnational access projects that have been supported within HYDRALAB III as well as the focussed joint research activities SANDS and CoMIBBS Its primary purpose is to serve as a shared resource to disseminate the outstanding advances achieved within HYDRALAB III but even more than this it is a tribute to the human and institutional collaborations that led to and sustained the research advances the human relationships that were strengthened and initiated through joint participation in the Programme and the training opportunities that participation provided to the many young researchers engaged in the projects
