

# The Water Cycle

## Applicable TEKS

Science Grade 4	Science Grade 5	Science Grade 6
4.1 B 4.7 A, B, C 4.8 B	5.1 B 5.5 D 5.7 B 5.8 B 5.9 A, B, D	6.1 B

## Duration

Three 40-minute lessons.

## Objectives

Students will grasp the relatively small amount of water that is available for human consumption. Students will understand the water cycle and its nomenclature. Students will also understand a water cycle that includes human activities (watering the lawn, washing your hands, flushing the toilet, etc.).

## Prerequisites

None.

## Materials

- ▶ Glass of water
- ▶ Apple and a knife
- ▶ Handout 1—*Water Recycles: The Complete Story* (GI-403)
  - You can request free color copies online at [takecareoftexas.org/publications](http://takecareoftexas.org/publications).

## Procedure

### Introduction

1. Show your students a glass of water. Ask them what they know about water.
2. Review with your students the information in the guide under the section: “What Is Water? What Is Water

Quality?”—specifically, about water’s basic properties and how the water they drink contains dissolved gases, maybe some organic matter, or even suspended particles.

3. Next, ask them where did this water come from. After the class understands that the water came from ground-water or surface water (rivers and lakes), continue to the lesson *Earth’s Water*.

## Earth’s Water

1. Tell your students that you will show them how much water is on the Earth that is available for human use.
2. Show the apple and tell them that this apple represents all of the water that is on the Earth. Ask them: how much of this water is ocean salt water?
3. Cut a very small slice out of the apple, about 3 percent of the entire apple.
4. Say that this small slice represents freshwater (3 percent) and the rest represents ocean saltwater (97 percent). Let them know that this “freshwater” piece includes water trapped in glaciers and ice caps, but we don’t get our water from these sources.
5. Next, cut a third off this small slice.
6. Tell them that the bigger piece is the freshwater trapped in glaciers and ice caps (about 2 percent of the total water on the Earth); the tiny little piece (only 1 percent of the total water on the Earth) represents all of the groundwater and water held in lakes and rivers. Let them know that this is where all of our water comes from, this one tiny, little piece.
7. With the little piece in your hand, point to the peel and say that this represents the water that is in rivers and lakes (only 0.02 percent of the total water on the Earth).
8. Let your students know that the upcoming lessons are about water and protecting our surface drinking water sources, the peel of the tiny little piece.

## Handout 1—Water Recycles, the Complete Story

1. Review with your students the information in the guide under “The Water (Hydrologic) Cycle.”
2. When ready, have them open up their binder to Handout 1. Discuss the water cycle that includes human consumption, including these points:
