

ApexTrack – Peak Integration Events

Valley-to-Valley Event:

- The Valley-to-Valley event directs ApexTrack to replace the valley (V) boundaries and crossing points (X) with baseline (B) boundaries. Thus if a peak cluster contains only V boundaries, this event will transform it into a series of individual, baseline-resolved peaks.
- The time of a B has the same time as that V it replaces. The Valley-to-Valley event is applied only after all peaks, baselines, and boundaries have been established. Shoulder and round boundaries are generally unchanged by the Valley-to-Valley event.
