**Abstract:** In this paper, we study the asymptotic behavior of the spectral density of the sample covariance matrix of a stationary Gaussian process with a long-range dependence structure. The spectral density is assumed to be of the form  $f(\lambda) = \lambda^{-2d} g(\lambda)$ , where  $d$  is the degree of the long-range dependence and  $g(\lambda)$  is a smooth function. We show that the spectral density of the sample covariance matrix converges to the spectral density of the underlying process as the sample size goes to infinity.

Abstract: This article provides insight into the relationship between an individual's level of involvement in the firm's community and the firm's performance. The article argues that the relationship between the two is not linear, but rather, it is curvilinear. The article also discusses the importance of the firm's community involvement in the context of the firm's overall strategy.
