Virtual Storytelling. Using Virtual Reality Technologies for Storytelling Olivier Balet, Gerard Subsol, Patrice Torquet, 2003-06-30 The story is the richest heritage of human civilizations One can imagine the first stories being told several thousand centuries ago by wise old men huddled around camp fires Since this time the narrative process has been considerably developed and enriched sounds and music have been added to complement the speech while scenery and theatrical sets have been created to enhance the story environment Actors dancers and technicians have replaced the lone storyteller The story is no longer the sole preserve of oral narrative but can be realized in book theatrical dance or movie form Even the audience can extend up to several million individuals And yet in its many forms the story lies at the heart of one of the world's most important industries The advent of the digital era has enhanced and accelerated this evolution image synthesis digital special effects new Human Computer interfaces and the Internet allow one not only to realize more sophisticated narrative forms but also to create new concepts such as video gaming and virtual environments The art of storytelling is becoming evermore complex Virtual reality offers new tools to capture and to interactively modify the imaginary environment in ever more intuitive ways coupled with a maximum sensory feedback In fact virtual reality technologies offer enhanced and exciting production possibilities for the creation and non linear manipulation in real time of almost any story form This has led to the new concept of Virtual Storytelling

**Virtual Pedophilia** Gillian Harkins, 2020-04-10 In Virtual Pedophilia Gillian Harkins traces how by the end of the twentieth century the pedophile as a social outcast evolved into its contemporary appearance as a virtually normal white male The pedophile's

alleged racial and gender normativity was treated as an exception to dominant racialized modes of criminal or diagnostic profiling The pedophile was instead profiled as a virtual figure a potential threat made visible only when information was transformed into predictive image The virtual pedophile was everywhere and nowhere slipping through day to day life undetected until people learned how to arm themselves with the right combination of visually predictive information Drawing on television movies and documentaries such as Law and Order SVU To Catch a Predator Mystic River and Capturing the Friedmans Harkins shows how diverse U S audiences have been conscripted and trained to be lay detectives who should always be on the lookout for the pedophile as virtual predator In this way the perceived threat of the pedophile legitimated increased surveillance and ramped up legal strictures that expanded the security apparatus of the carceral state
