7 Configure the sensitivity and lock out the sensor.

Select the sensitivity appropriate for the application (see options below), replace the front cover, and apply power to the sensor. Right away after the LED stops flashing (see the LED operation section). Walk through the detection zones, observing the sensor's LED whenever motion is detected. The red LED shows when it detects motion.

The adjustable range of all PIR units is subject to variation because of different types of clothing, backgrounds, and ambient temperature. For this reason, expect that the most likely detector motion is well within the PIR's detection zones and that with testing is carried out during these modes.

Note: This is the recommended sensitivity for applications with pets up to 15 kg (33 lb) or less and for the Pet Immune lens. Recommended for high security applications.

Note: For High Security applications, use the High Security lens. Disable the LED (S1=OFF), and set the sensitivity to High (S1 and S2=ON).
