the motorways and the secret first electronic computers Ian Wray's remarkable book puts successful infrastructure plans under the microscope Who made these plans and what made them stick How does this reflect the defining characteristics of British government And what does that say about the individuals who drew them up and saw them through In so doing the book casts refreshing new light on how big decisions have actually been made revealing the hidden sources of drive and initiative in British society as seen through the lens of plans past And it asks some searching questions about the mechanisms we might need for successful plans future in Britain and elsewhere Includes foreword by the Right Honourable the Lord Heseltine CH
