Distributed Constraint Problem Solving and Reasoning in Multi-agent Systems Weixiong Zhang, Volker Sorge, 2004 Distributed and multi agent systems are becoming more and more the focus of attention in artificial intelligence research and have already found their way into many practical

applications An important prerequisite for their success is an ability to flexibly adapt their behavior via intelligent cooperation Successful reasoning about and within a multiagent system is therefore paramount to achieve intelligent behavior Distributed Constraint Satisfaction Problems DCSPs and Distributed Constraint Optimization minimization Problems DCOPs are perhaps ubiquitous in distributed systems in dynamic environments Many important problems in distributed environments and systems such as action coordination task scheduling and resource allocation can be formulated and solved as DCSPs and DCOPs Therefore techniques for solving DCSPs and DCOPs as well as strategies for automated reasoning in distributed systems are indispensable tools in the research areas of distributed and multi agent systems They also provide promising frameworks to deal with the increasingly diverse range of distributed real world problems emerging from the fast evolution of communication technologies The volume is divided in two parts One part contains papers on distributed constraint problems in multi agent systems The other part presents papers on Agents and Automated Reasoning
