**Jean-Baptiste François Xavier Cousin

The Last Man:

The Last Man Mary Wollstonecraft Shelley, 1998-07-16 *The Last Man* is Mary Shelley's apocalyptic fantasy of the end of human civilisation. Set in the late twenty-first century, the novel unfolds a sombre and pessimistic vision of mankind confronting inevitable destruction. Interwoven with her futuristic theme, Mary Shelley incorporates idealised portraits of Shelley and Byron yet rejects Romanticism and its faith in art and nature.

The Last Man (Annotated) Mary Shelley, 2019-03-02 A futuristic story of tragic love and of the gradual extermination of the human race by plague. *The Last Man* is Mary Shelley's most important novel after *Frankenstein*. With intriguing portraits of Percy Shelley and Mary Shelley, it is a masterpiece of the genre.

The Last Man Mary Wollstonecraft Shelley, Hugh J. Luke, Jr., Anne K. Mellor, 1993-11-01 *The Last Man* ends in 2100, the last year of the world. A devastating plague has wiped out humanity except for one man. This novel of horror, originally published in 1826, was rejected in its time and out of print from 1833 to 1963 when the first Bison Books edition appeared. Some critics now rate *The Last Man* more highly than *Frankenstein* by the same author. This Bison Books edition offers a new introduction by Anne K. Mellor who writes: "In our era of AIDS and biological warfare, Shelley's apocalyptic vision of an incurable plague that gradually destroys the entire human species resonates with mythic power."

The Last Man Jean-Baptiste François Xavier Cousin de Grainville, 2002 New English translation of this demise of the human race story.

Last Man: The Show Bastien Vivès, Balak, Michaël Sanlaville, 2016-02-16 People are puzzled when Richard Aldana, a mysterious stranger who smokes cigarettes and wears a leather jacket, arrives in a medieval town where everyone else is casting spells and weaving tapestries. But when he enrolls in the games, he quickly becomes a top contender using only his martial arts prowess.

Intermodernism Kristin Bluemel, 2009-10-05 These 10 original critical essays examine the fascinating writing of the Depression and World War II. Divided into four sections: Work, Community, War, and Documents, the volume focuses on texts that are typically ignored in accounts of modernism or The Auden Generation. Chapters examine writing by Elizabeth Bowen, Storm Jameson, William Empson, George Orwell, J. B. Priestley, Harold Heslop, T. H. White, Sylvia Townsend Warner, Rebecca West, John Griereson, Margery Allingham, and Stella Gibbons. These authors were politically radical or radically eccentric and tended to be committed to working-class and middle-class cultures, non-canonical genres such as crime and fantasy, and minority forms of

narrative such as journalism manifestos film and travel narratives as well as novels The volume supports further research with an appendix Who Were the Intermodernists a listing of archival sources and an extensive bibliography **The Legacy of Rousseau** Clifford Orwin, Nathan Tarcov, 1997-03-29 Few thinkers have enjoyed so pervasive an influence as Rousseau who originated dissatisfaction with modernity By exploring polarities articulated by Rousseau nature versus society self versus other community versus individual and compassion versus competitiveness these fourteen original essays show how his thought continues to shape our ways of talking feeling thinking and complaining The volume begins by taking up a central theme noted by the late Allan Bloom Rousseau s critique of the bourgeois as the dominant modern human type and as a being fundamentally in contradiction caught between the sentiments of nature and the demands of society It then turns to Rousseau s crucial polarity of nature and society and to the later conceptions of history and culture it gave rise to The third part surveys Rousseau s legacy in both domestic and international politics Finally the book examines Rousseau s contributions to the virtues that have become central to the current sensibility community sincerity and compassion Contributors include Allan Bloom Fran ois Furet Pierre Hassner Christopher Kelly Roger Masters and Arthur Melzer

Impossibility Fiction Derek Littlewood, Peter Stockwell, 1996 Impossibility fiction is an intergenre that has recently been the resort of many writers searching for new ways of understanding and expressing the real world of the imagination making use of fantasy alternative history and science fiction Coping with ideas that are both impossible and realistically constructed is the ultimate contemporary challenge of our technology The chapters of this book move towards establishing appropriate readings that allow contemporary readers to negotiate unreality a skill that the end of the millennium is making inevitably necessary Such strategies have long been the preserve of literary and cultural study and here a number of well regarded scholars and some new to the field make their contribution to an area that has become increasingly important in recent years From Mary Shelley to Philip K Dick Iain M Banks to J G Ballard taking in African American science fiction Jurassic Park and Kurt Vonnegut and exploring issues of alternative history and ideology feminism the holocaust characterisation and impossible geography this collection is an important source book for all those interested in the literature culture and philosophy of realistic impossible worlds The Ethics of Technology Martin Peterson, 2017-06-01 Autonomous cars drones and electronic surveillance systems are examples of technologies that raise serious ethical issues In this analytic investigation Martin Peterson articulates and defends five moral principles for addressing ethical issues related to new and existing technologies the cost benefit principle the precautionary principle the sustainability principle the autonomy principle and the fairness principle It is primarily the method developed by Peterson for articulating and analyzing the five principles that is novel He argues that geometric concepts such as points lines and planes can be put to work for clarifying the structure and scope of these and other moral principles This geometric account is based on the Aristotelian dictum that like cases should be treated alike meaning that the degree of similarity between different cases can be

represented as a distance in moral space The more similar a pair of cases are from a moral point of view the closer is their location in moral space A case that lies closer in moral space to a paradigm case for some principle p than to any paradigm for any other principle should be analyzed by applying principle p The book also presents empirical results from a series of experimental studies in which experts philosophers and laypeople engineering students have been asked to apply the geometric method to fifteen real world cases The empirical findings indicate that experts and laypeople do in fact apply geometrically construed moral principles in roughly but not exactly the manner advocates of the geometric method believe they ought to be applied

Sonic Encounters with

Blanchot Adam Potts,2020-06-05 Sonic Encounters with Blanchot is the first book to explore the relationship of sound and music with the work of Maurice Blanchot The volume brings together scholars from a range of disciplines who listen closely to the sounds and resonances emanating from within Blanchot's work and who consider their significance both within his work and beyond The latent and explicit sonic content of Blanchot's writing is explored as is his treatment of music and the possibilities of thinking about contemporary music and sound art through his work Although Blanchot is best known for his engagement with literature an engagement that often relies on visual references and experiences this collection takes a sonic route into one of the most exciting and demanding thinkers of the twentieth century As an interdisciplinary exploration of sound and Blanchot's work this book will be of interest to those studying sound in literature and music as well as students of Blanchot's work in general This book was originally published as a special issue of *Angelaki* *Reframing the International*

Richard Falk,R.B.J. Walker,Lester Ruiz,2013-10-08 *Re Framing the International* insists that if we are to properly face the challenges of the coming century we need to re-examine international politics and development through the prism of ethics and morality International relations must now contend with a widening circle of participants reflecting the diversity and unevenness of status memory gender race culture and class **An Empire of Air and Water** Siobhan Carroll,2015-03-04 Planetary spaces such as the poles the oceans the atmosphere and subterranean regions captured the British imperial imagination Intangible inhospitable or inaccessible these blank spaces what Siobhan Carroll calls atopias existed beyond the boundaries of known and inhabited places The eighteenth century conceived of these geographic outliers as the natural limits of imperial expansion but scientific and naval advances in the nineteenth century created new possibilities to know and control them This development preoccupied British authors who were accustomed to seeing atopic regions as otherworldly marvels in fantastical tales Spaces that an empire could not colonize were spaces that literature might claim as literary representations of atopias came to reflect their authors' attitudes toward the growth of the British Empire as well as the part they saw literature playing in that expansion Siobhan Carroll interrogates the role these blank spaces played in the construction of British identity during an era of unsettling global circulations Examining the poetry of Samuel T Coleridge and George Gordon Byron and the prose of Sophia Lee Mary Shelley and Charles Dickens as well as newspaper accounts and voyage narratives she traces the ways Romantic and Victorian writers reconceptualized atopias as threatening or at times vulnerable These textual explorations of the earth's highest reaches and secret depths shed light on persistent facets of the British global and environmental imagination that linger in the twenty-first century Nietzsche and the Modern Crisis of the Humanities

Peter Levine,1995-01-01 This is a critique of Nietzsche's theory of culture that proposes an alternative paradigm allowing a defense of the humanities against such Nietzscheans as Leo Strauss and Derrida *What Nietzsche Really Said* Robert C. Solomon,Kathleen M. Higgins,2012-11-07 *What Nietzsche Really Said* gives us a lucid overview both informative and entertaining of perhaps the most widely read and least understood philosopher in history Friedrich Nietzsche

s aggressive independence flamboyance sarcasm and celebration of strength have struck responsive chords in contemporary culture More people than ever are reading and discussing his writings But Nietzsche s ideas are often overshadowed by the myths and rumors that surround his sex life his politics and his sanity In this lively and comprehensive analysis Nietzsche scholars Robert C Solomon and Kathleen M Higgins get to the heart of Nietzsche s philosophy from his ideas on the will to power to his attack on religion and morality and his infamous *Übermensch* superman What Nietzsche Really Said offers both guidelines and insights for reading and understanding this controversial thinker Written with sophistication and wit this book provides an excellent summary of the life and work of one of history s most provocative philosophers
