Problems for Constrained Global Optimization Algorithms Christodoulos A. Floudas, Panos M. Pardalos, 1990-09-15 Significant research activity has occurred in the area of global optimization in recent years. Many new theoretical, algorithmic, and computational contributions have resulted. Despite the major importance of test problems for researchers, there has been a lack of representative nonconvex test problems for constrained global optimization algorithms. This book is motivated by the scarcity of global optimization test problems and represents the first systematic collection of test problems for evaluating and testing constrained global optimization algorithms. This collection includes problems arising in a variety of engineering applications and test problems from published computational reports. **Handbook of Global Optimization** R.

Horst, Panos M. Pardalos, 2013-12-11 Global optimization is concerned with the computation and characterization of global optima of nonlinear functions. During the past three decades, the field of global optimization has been growing at a rapid pace, and the number of publications on all aspects of global optimization has been increasing steadily. Many applications, as well as new theoretical, algorithmic, and computational contributions, have resulted. The Handbook of Global Optimization is the first comprehensive book to cover recent developments in global optimization. Each contribution in the Handbook is essentially expository in nature but scholarly in its treatment. The chapters cover optimality conditions, complexity results, concave minimization, DC programming, general quadratic programming, nonlinear complementarity, minimax problems, multiplicative programming, Lipschitz optimization, fractional programming, network problems, trajectory methods, homotopy methods, interval methods, and stochastic approaches. The Handbook of Global Optimization is addressed to researchers in mathematical programming as well as all scientists who use optimization methods to model and solve problems. *HCI Challenges and Privacy Preservation in Big Data Security* Lopez, Daphne, Durai, M.A. Saleem, 2017-08-10 Privacy protection within large databases can be a challenge. By examining the current problems and challenges, this domain is facing more efficient strategies can be established to safeguard personal information against invasive pressures. *HCI Challenges and Privacy Preservation in Big Data Security* is an informative scholarly publication that discusses how human-computer interaction impacts privacy and security in almost all sectors of modern life. Featuring relevant topics such as large-scale security, data threat detection, big data encryption, and identity management, this reference source is ideal for academicians, researchers, advanced-level students, and engineers that are interested in staying current on the advancements and drawbacks of human-computer interaction within the world of big data.
