Generating Power at High Efficiency E Jeffs, 2008-04-24 Combined cycle technology is

used to generate power at one of the highest levels of efficiency of conventional power plants It does this through primary generation from a gas turbine coupled with secondary generation from a steam turbine powered by primary exhaust heat

Generating power at high efficiency thoroughly charts the development and implementation of this technology in power plants and looks to the future of the technology noting the advantages of the most important technical features including gas turbines steam generator combined heat and power and integrated gasification combined cycle IGCC with their latest applications Reviews key developments in combined cycle technology Uses examples drawn from plants around the world Looks at how combined cycle technology can evolve to meet future energy needs *Ocean Industry* ,1983 **Advanced Gas Turbine Cycles** J.H. Horlock,2013-10-22 Primarily this book describes the thermodynamics of gas turbine cycles The search for high gas turbine efficiency has produced many variations on the simple open circuit plant involving the use of heat exchangers reheating and intercooling water and steam injection cogeneration and combined cycle plants These are described fully in the text A review of recent proposals for a number of novel gas turbine cycles is also included In the past few years work has been directed towards developing gas turbines which produce less carbon dioxide or plants from which the CO₂ can be disposed of the implications of a carbon tax on electricity pricing are considered In presenting this wide survey of gas turbine cycles for power generation the author calls on both his academic experience at Cambridge and Liverpool Universities the Gas Turbine Laboratory at MIT and Penn State University and his industrial work primarily with Rolls Royce plc The book will be essential reading for final year and masters students in mechanical engineering and for practising engineers **Arctic National Wildlife Refuge, Alaska** United States.
