QUESTION Suppose that the demand for a good is given by $Q = 100 - 2P$ and the supply is given by $Q = -20 + 10P$. What is the equilibrium price and quantity?

ANSWER To find the equilibrium price and quantity, we set the demand equal to the supply and solve for P .
 $100 - 2P = -20 + 10P$
 $120 = 12P$
 $P = 10$
Substituting $P = 10$ into the demand equation, we find the equilibrium quantity:
 $Q = 100 - 2(10) = 80$
Therefore, the equilibrium price is 10 and the equilibrium quantity is 80.

Computer Buyer's Guide and Handbook, 2000-07 **Applied Olfactory Cognition** Gesualdo M Zucco, Benoist
Schaal, Mats Olsson, Ilona Croy, 2014-12-02 Foreword by Richard J Stevenson Macquarie University Australia It was long
thought that the human nose might be able to discriminate somewhere in the order of 10 000 different odourants The recent
finding that the human nose can discriminate something like a trillion different smells serves as yet another reminder that we
have again underestimated the capacity of our sense of smell Bushdid Magnasco Vosshall Keller 2014 This volume serves as
a further corrective for anyone who should hold the view that olfaction is unimportant in human affairs The papers presented
in this ebook carefully collated and overseen by Aldo Zucco Benoist Schaal Mats Olsson and Ilona Croy showcase a large
number of quite different reasons for studying the applied side of olfaction and indeed human olfaction in general The 23
contributions presented here cover a broad range of topics which illustrate contemporary interests in our field Although with
a strong applied focus a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed
These range from considerations of olfactory perception memory expertise and priming right the way through to receptor
genetics These contributions from many leading experts in the field will surely shape much of the applied work linking
olfaction to disease which is a further focus of this ebook In respect to health and disease the chapters on aging pregnancy
depression alcohol dependency and environmental odours present overviews and rich new data on many contemporary
problems to which the study of olfaction is now contributing A particularly notable aspect of olfactory experience is the
affective impact that odours can have on people and their lives The ebook covers some particularly intriguing aspects of work
in this area with empirical studies investigating dissociations between wanting and liking stress reduction in the elderly

mother infant bonding and the emotions that different odourants can evoke This affective line of work is nicely complemented by empirical studies on expertise the effect of odours on visual attention and the relationship between particular personality traits and interest in olfaction The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook with at least three of the chapters reporting data using neuroimaging including a particular intriguing study looking at recognition of odours in mixtures Finally the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine I hope that readers of this e book will be struck as I have been in reading its various chapters how much olfaction affects our lives and how the study of this sense can enrich it
