Running With Scissors Book Analysis:

Book Review Digest, 1927 *Authorial Ethics* Robert Hauptman, 2011-02-22 *Authorial Ethics* is a normative study that deals with the many ways in which writers abuse their commitment to truth and integrity. It is divided by academic discipline and includes chapters on journalism, history, literature, art, psychology, and science, among others. Robert Hauptman offers generalizations and theoretical remarks exemplified by specific cases. Two major abrogations are inadvertent error and purposeful misconduct, which is subdivided into falsification, fabrication, and plagiarism. All of these problems appear in most disciplines, although their negative impact is felt most potently in biomedical research and publication. Professor Mary Lefkowitz, the classicist, provides an incisive foreword.

Sample Book Insights

- 1 I loved to fly and I wanted to be the one who opened those cabinets above the seats. I would get to serve peanuts in small foil packets and offer people small plastic cups of soda.
- 2 I love my mother's bag. It is filled with papers and her wallet, cigarettes, and at the bottom, where she never looks, there is loose change, loose mints, and tobacco from her cigarettes.
- 3 I am like that lady on TV, Maude, except my mother doesn't have all those chins under her chin, all those loose expressions hanging off her face. I am a star like Maude.
- 4 I will read a poem from her book with her distinctive and refined Southern inflection. I will turn off all the lights in the house, go into my bedroom, and close the door. I will stand in the light of my desk lamp and look at myself in the mirror.

Books and Beyond Kenneth Womack, 2008-10-30. There is a strong interest in reading for pleasure or self-improvement in America, as shown by the popularity of Harry Potter and book clubs including Oprah Winfrey's. Although recent government reports show a decline in recreational reading, the same reports show a strong correlation between interest in reading and academic achievement. This set provides a snapshot of the current state of popular American literature, including various types and genres. The volume presents alphabetically arranged entries on more than 70 diverse literary categories, such as cyberpunk, fantasy, literature, flash fiction, LGBTQ literature, graphic novels, manga, and anime, and zines. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected general bibliography. Reading in America for pleasure and knowledge continues to be popular, even while other media compete for attention. While students continue to read many of the standard classics, new genres have emerged. The Adaptation Industry Simone Murray,2012-03-12 Adaptation constitutes the driving force of contemporary culture with stories adapted across an array of media formats However adaptation studies has been concerned almost exclusively with textual analysis in particular with compare and contrast studies of individual novel and film pairings This has left almost completely unexamined crucial questions of how adaptations come to be made what are the industries with the greatest stake in making them and who the decision makers are in the adaptation process The Adaptation Industry re imagines adaptation not as an abstract process but as a material industry It presents the adaptation industry as a cultural economy of six interlocking institutions stakeholders and decision makers all engaged in the actual business of adapting texts authors agents publishers book prize committees scriptwriters and screen producers and distributors Through trading in intellectual property rights to cultural works these six nodal points in the adaptation network are tightly interlinked with success for one party potentially auguring for success in other spheres But marked rivalries between these institutional forces also exist with competition characterizing every aspect of the adaptation process This book constructs an overdue sociology of contemporary literary adaptation never losing sight of the material and institutional dimensions of this powerful process
