

## The RCA Advantage.

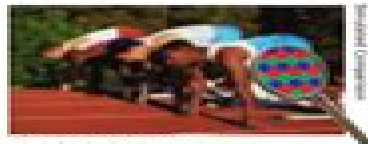

RCA HDTV comes with the capability of receiving every broadcast and DIRECTV® satellite signal currently available.

### How It Works

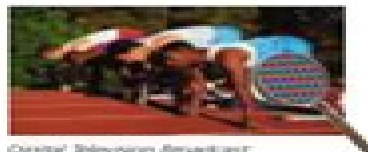

The RCA HDTV is a receiver/monitor capable of processing the highest resolution format HDTV signal. This receiver gives you the ability to receive a wide array of programming options including current local broadcast and high-definition (HD) broadcasts where available. In addition, the RCA HDTV will receive and decode standard digital and high-definition DIRECTV® programming.

DIRECTV and the Cyclone Design logo are trademarks of DIRECTV Inc., a unit of Hughes Electronics Corp. and are used with permission.

## The ABC's of Digital Television.

Standard NTSC Broadcast:  
200,000+ pixels

Digital Television Broadcast:  
1920 x 1080 Lines = 2,073,600 pixels

The Consumer Electronics Association (CEA) has divided the digital world into distinct groups, putting it into clear perspective. The three main categories are HDTV, SDTV and EDTV.

### HDTV

HDTV is the highest form of digital television. It refers to a fully integrated system with a built-in digital receiver/decoder, either 720 or 1080 scan lines, a wide aspect ratio (16-9) and 5.1 channel Dolby Digital® surround sound.

### SDTV

Standard Definition television (SDTV) offers essentially the same quality as today's current analog televisions (480 scan lines), although its digital transmission eliminates snow and ghosting.

### EDTV

Between HDTV and SDTV is Enhanced Definition television (EDTV). EDTV is a system that produces a display quality that's generally somewhere between 540 and 720 scan lines.
