

Practice: pages 20–25

- 1 Answer is B. From experiments 1 and 3 the order with respect to Cl_2 is 1 (the rate quadruples as the concentration doubles. Therefore, in an experiment using 0.80 mol dm^{-3} of CO and 0.20 mol dm^{-3} of Cl_2 , the rate will be halved from the $6.4 \times 10^{-24} \text{ mol dm}^{-3} \text{ min}^{-1}$ obtained in experiment 1. (There is no need to work out the order with respect to CO.) [1]
- 2 Answer is B. The concentration halves every 120 s. So, the sequence of half-lives is $2.4 \rightarrow 1.2 \rightarrow 0.6 \rightarrow 0.3 \rightarrow 0.15$; that is four half-lives which is $4 \times 120 \text{ s}$. [1]
- 3 Answer is C. For a zero order reaction, the rate of decomposition is a constant. [1]
- 4 Answer is A. the decomposition is $\text{Rate} = k[\text{X}]^2$ [1]
From the data given, $0.016 = k[1]^2$ [1]
Therefore, $k = 0.016 \text{ s}^{-1}$. If $[\text{X}] = 0.25 \text{ mol dm}^{-3}$, $\text{rate} = 0.016[0.25]^2$
 $= 0.001 \text{ dm}^3 \text{ mol}^{-1} \text{ s}^{-1}$ [1]
- 5 Answer is B. The overall order is 2, so the units are $\frac{1}{\text{concentration} \times \text{s}}$. [1]
- 6 Answer is D. I_2 has an order of zero and is not involved in the rate-determining step. Therefore, it can be ignored. In D, $[0.1][2]$ has a value that is greater than $[0.1][1]$. [1]
- 7 Answer is C. The slow step + the fast step must give the overall equation. I must, therefore, be removed in the fast step in a reaction with G, and some J and K must be formed. [1]
- 8 Answer is B. The rate equation is $\text{Rate} = k[\text{halide}]$ so statements 1 and 2 are correct. Raising the temperature will increase the rate of reaction by allowing more molecules to exceed the activation energy, but the activation energy is fixed and will not change. [1]
- 9 Answer is D. Increasing the amount of ozone present does not change the order with respect to ozone. A large excess is not necessary to ensure enough ozone is present. The purpose of a large excess is to make sure that during the reaction its concentration is virtually constant. Therefore, only statement 3 is correct. [1]
- 10 Answer is A. Experiments 2 and 3 give the order with respect to X as zero. Experiments 1 and 2 give the order with respect to Y as 2. So statements 1 and 2 are correct. The rate constant is calculated from a set of results, for example, experiment 1 gives $0.08 = k[0.10]^2$.
So $k = 8.0 \text{ dm}^3 \text{ mmol}^{-1} \text{ s}^{-1}$ and statement 3 is, therefore, correct. [1]
- 11 a) $2\text{N}_2\text{O}_5(\text{g}) \rightarrow 4\text{NO}_2(\text{g}) + \text{O}_2(\text{g})$ [1]
b) i) For every 2 mol of N_2O_5 that reacts 4 mol of NO_2 is formed. Therefore, the rate of formation of NO_2 is twice as fast as the loss of N_2O_5 , i.e. $7.0 \times 10^{-4} \text{ mol dm}^{-3} \text{ s}^{-1}$. [1]
ii) For oxygen, the rate of formation will be $\frac{1}{2}$ the rate of loss of N_2O_5 ,
i.e. $1.75 \times 10^{-4} \text{ mol dm}^{-3} \text{ s}^{-1}$ [1]

Behavior Analysis and Learning Erin B. Rasmussen, Casey J. Clay, W. David Pierce, Carl D. Cheney, 2022-12-30 Using a behavioral perspective Behavior Analysis and Learning provides an advanced introduction to the principles of behavior analysis and learned behaviors covering a full range of principles from basic respondent and operant conditioning through applied behavior analysis into cultural design The text uses Darwinian neurophysiological and biological theories and research to inform B F Skinner's philosophy of radical behaviorism The seventh edition expands the focus on neurophysiological mechanisms and their relation to the experimental analysis of behavior providing updated studies and references to reflect current expansions and changes in the field of behavior analysis By bringing together ideas from behavior analysis neuroscience epigenetics and culture under a selectionist framework the text facilitates understanding of behavior at environmental genetic neurophysiological and sociocultural levels This grand synthesis of behavior neuroscience and neurobiology roots behavior firmly in biology The text includes special sections New Directions Focus On Note On On the Applied Side and Advanced Section which enhance student learning and provide greater

insight on specific topics This edition was also updated for more inclusive language and representation of people and research across race ethnicity sexuality gender identity and neurodiversity Behavior Analysis and Learning is a valuable resource for advanced undergraduate and graduate students in psychology or other behavior based disciplines especially behavioral neuroscience The text is supported by Support Material that features a robust set of instructor and student resources www.routledge.com/9781032065144 **Energy Research Abstracts**, 1993 **Future Electricity System Based on Energy Internet: Energy storage system design, Optimal Scheduling, Security, Attack Model and Countermeasures** Dou An, Huan Xi, Hanlin Zhang, Jianhua Yang, Lei Chai, 2023-11-09 Energy Internet a futuristic evolution of electricity system is conceptualized as an energy sharing network The energy internet integrates advanced sensors efficient measurement technologies advanced control methods and efficient energy utilization conversion storage system to achieve economical efficient and environmentally friendly operation of the power grid system The energy internet also contains a large amount of heterogeneous information which requires the support of information technology more than traditional power system design Moreover due to the open network environment of the energy internet any anomaly or malicious attack in the system can bring unpredictable and significant losses to the overall grid operation Science and Philosophy of Behavior William M. Baum, 2022-07-27 Rediscover the science and philosophy of behavior In Science and Philosophy of Behavior Selected Papers distinguished researcher W M Baum delivers an expansive collection of incisive papers setting out a new paradigm of thinking about behavior The book offers only articles that put forward a philosophical and theoretical framework for an effective natural science of behavior Quantitative analysis is largely avoided except for a paper on all things avoidance Organized into three parts the author explains the flow like nature of behavior and its link to evolution as well as descriptions of a pure form of behaviorism that correct some flaws in B F Skinner s seminal works The book also links behaviorism to anthropology in its final section Readers will also find Fulsome descriptions of the molar nature of behavior and why the molecular view is misguided Re imaginations of the concept of reinforcement including considerations of allocation induction and contingency Explorations of the links between behavior analysis and Darwinian evolutionary processes An essential critique and reorganization of behavior theory and philosophy Science and Philosophy of Behavior Selected Papers is a controversial fascinating and eye opening journey through a half century of transformational work in the field , Models of Action Clive D.L. Wynne, John E.R. Staddon, 2013-06-17 This volume presents an international group of researchers who model animal and human behavior both simple and complex The models presented focus on such subjects as the pattern of eating in meals and bouts the energizing and shaping impact of reinforcers on behavior transitive inferential reasoning responding to a compound stimulus avoidance and escape learning recognition memory category formation generalization the timing of adaptive responses and chromosomes exchanging information The chapters are united by a common interest in adaptive behavior whether of human animal or artificial system and clearly demonstrate the rich variety

of ways in which this fascinating area of research can be approached In so doing the book demonstrates the range of thought that qualifies as theorizing in the contemporary study of the mechanisms of adaptive behavior It has two purposes to bring together a very wide range of approaches in one place and to give authors space to explain how their ideas developed Journal literature often presents fully formed theories with no explanation of how an idea came to have the shape in which it is presented In this volume however leaders in different fields provide background on the development of their ideas Where once psychologists and a few zoologists had this field to themselves now various types of computer scientists have added great energy to the mix
