110 Strategies for Success in College and Life Joan H. Rollins & Mary Zahm, 2006-02-13 110 Strategies for Success in College and Life offers students clear presentations of 110 strategies to guide them through to college graduation and beyond. These principles are derived from numerous research studies from a wide range of areas within psychology as well as from the authors' many years of experience as college professors, researchers, and student advisors. This book closes the gap between scientific knowledge and its application to college success. Topics include information processing and learning, critical thinking and decision making, identifying and achieving goals, managing time, money, and energy, reading and writing effectively, reducing test anxiety, knowing thyself, and preparing for a career. The latest research findings are presented. It is a valuable guide for freshmen, whether coming right out of high school or after a hiatus of years working and/or taking care of a family. This book is particularly appropriate for minority and first-generation college students who may have fewer mentors to help them along the college path. Each chapter offers case studies of successful students to serve as role models. The focus of the book is on the practical application of the strategies in the student's daily life within a framework of flexibility, integrity, and balance.
