

# The Six Pillars of Self-Esteem

NATHANIEL BRANDEN

## The Practice of Living Consciously

There can be no change and no development without first becoming aware of our behaviors, tendencies and usual responses to certain events. Distinguish between a fact and your emotional response. As we start to become aware of our thoughts and behaviors, we can assess our actions.

## The Practice of Self-Responsibility

We're responsible when we're able to respond to life's challenges as healthy, autonomous human beings — not as victims, blaming this or that for our challenges, but as individuals who own our abilities to manifest our desires as we engage in life.

## The Practice of Living Purposefully

To live purposefully is to use our powers for the attainment of goals we have selected. So, what are your goals? What deeply inspires you? These aren't things that you think would impress others, but the visions that deeply resonate with your highest values and ideals.

## The Practice of Self-Acceptance

The greatest crime we commit against ourselves is not that we may deny or disown our shortcomings, but that we deny and disown our greatness — because it frightens us.

## The Practice of Self-Assertiveness

To practice self-assertiveness is to live authentically, to speak and act from my innermost convictions and feelings — as a way of life, as a rule. Remember the idea that "authentic" and "author" come from the same root. To be authentic is literally to be the author of your own story.

## The Practice of Personal Integrity

Integrity is the integration of ideals, convictions, standards, beliefs — and behavior. When our behavior is congruent with our professed values, when ideals and practice match up, we have integrity. Do your ideals, convictions, standards, beliefs and behavior all line up?

The Moral Laboratory Frank Hakemulder,2000-06-15 The idea that reading literature changes the reader seems as old as literature itself Through the ages philosophers writers and literary scholars have suggested it affects norms empathic ability self concept beliefs etc This book examines what we actually know about these effects And it finds strong evidence for the old claims However it remains unclear what aspects of the reading experience are responsible for these effects Applying methods of the social sciences to this particular problem of literary theory this book presents a psychological explanation based upon the conception of literature as a moral laboratory A series of experiments examines whether imagining oneself in the shoes of characters affects beliefs about what it must be like to be someone else and whether it affects beliefs about consequences of behavior The results have implications for the role literature could play in society for instance in an alternative for traditional moral education
