1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

Circuit Description—A transformer-coupled common-emitter amplifier circuit. The input signal from the antenna connected across the secondary winding of the transformer is coupled to the base of the transistor through the coupling capacitor C₁. The emitter is bypassed to ground by the parallel combination of the resistor R_E and the capacitor C₂. The output of the amplifier is taken from the collector terminal through the load capacitor C_L.
