

P3 3.x provides an autocost rule to choose whether you want to use the updated percent complete to calculate actual quantity to date, actual cost to date, both (mark both checkboxes), or neither (clear both checkboxes). If both checkboxes are marked in P3 3.x, the setting in the Project Management module, Recalculate Actual Units and Cost when duration % complete changes, is marked. If neither checkbox is marked in P3 3.x, the setting is not marked in the Project Management module. If one checkbox is marked and the other is not, the setting in the Project Management module is not marked.

The Link actual to date and actual this period autocost rule in P3 3.x converts to the Link Actual and Actual this Period Units and Cost field in the Calculations tab in the Projects window in the Project Management module.

Data not converted This section lists the data items that are not converted from P3 3.x to the Project Management module. Refer to “Special considerations” on page 648 for additional cases.

- **Layouts, filters, Global Change specifications, and report and graphic specifications** Layouts, filters, Global Change specifications, and report and graphic specifications are not converted with the project; however, sample data is provided for these items in the Project Management module.
- **Access rights** Access rights are not converted in the Project Management module. Your system administrator must set up global and project profiles that determine privileges.
- **Leveling options and leveling priorities** Choose Tools, Level Resources, to set options for leveling in the Project Management module.
- **Financial periods and past period actuals** In the Project Management module, financial periods are global. Financial periods and past period actual data are not converted to the Project Management module because financial periods are project-specific in P3. Choose Admin, Financial Periods, to define financial periods in the Project Management module. After you define financial periods choose Tools, Store Period Performance, to store past period actuals per financial period.

Refer to the *Primavera Administrator's Guide* for more information on defining financial periods in the Project Management module.
