

PA20 Quick Reference Guide

Master Data

KHRIS stores employee data, known as **master data**, in a central database that can be shared across all functions in KHRIS. Master data contains the employee's personal, position, and organizational information, and includes all of the data required for processing benefits, time, and payroll.

Employee master data can be accessed using KHRIS transaction PA20. Within PA20, master data is grouped by like information and stored on linked screens. These screens of grouped data are called **infotypes**. Individually, the infotypes contain related master data. Together, these records combine to make up the employee's personal file. Just as a paper personnel file consists of various file tabs, the electronic file in PA20 utilizes infotypes to organize the employee's information.
