

ASEDrive PAC

The ASEDrive PAC Sector Readers/Writers family are fully-featured smartcard proximity readers/writers, ideal for highly secured facilities as well as other facilities that wish to utilize access control, intrusion, detection or time and attendance applications.

ASEDrive PAC Contactless CPU Smartcard Reader

The ASEDrive PAC introduces patented, industry first technology encased in a anti-vandal body, thus combining smart card technology with anti-vandal protection.

General Description

Programming of the reader is done by firmware upgrade, using Athena Smart Card Programmer.

The reader scans information stored within a smartcard, sends the data to a connected access control system, and allows the integrator to set secret keys for different sectors on the card. This established a unique network with proprietary cards, where no card can possibly have the same ID on the same location and with the same reader key.

The readers meet IP65 and are suitable for both indoor and outdoor use. The interface is a 10-wire pigtail (including Wiegand, USB & RS232) that allows you to connect the unit to a control panel.

Main Features

- Advanced, secure, multi-application functionality for intelligent applications.
- Easy to deploy in the field with the configuration card (Master card) for secure sector reading of data from the sectors.
- Configurable multi output format, supports various Wiegand formats and many more.
- Multiple keypad transmission formats (optional)

- Microsoft® Windows Compatible software for Master and User Card configuration.

Advanced Features

- Reads ISO14443 A/B & Mifare Standard cards.
- Dedicated LED and buzzer control inputs.
- Optical tamper sensor for case and wall tamper detection.
- Reads dedicated customer's sector or serial number.
- Internal Secure Access Module (SAM) socket (optional).
- Outdoor use and weather-resistance (IP65)
- 3 years HW warranty

System Components

The Readers are compatible with USB desktop card programmer and its associated software.

Pac User Manual

Sean Wilkins,Trey Smith

Pac User Manual:

User's Manual for a Computer Program for Simulating Intensively Managed Allowable Cut Robert W. Sassaman, Ed Holt, Karl Bergsvik, 1972 Detailed operating instructions are described for SIMAC a computerized forest simulation model which calculates the allowable cut assuming volume regulation for forests with intensively managed stands A sample problem illustrates the required inputs and expected output SIMAC is written in FORTRAN IV and runs on a CDC 6400 computer with a SCOPE 3 3 operating system The conceptual basis of the SIMAC method is not discussed in detail *PAC User Manual* Wolfgang Schreiner, 1992 Field Manuals United States.
