Designing Distributed Control Systems Veli-Pekka Eloranta, Johannes Koskinen, Marko Leppänen, Ville Reijonen, 2014-06-09 Designing Distributed Control Systems presents 80 patterns for designing distributed machine control system software architecture forestry machinery mining drills elevators etc These patterns originate from state of the art systems from market leading companies have been tried and tested and will address typical challenges in the domain such as long lifecycle distribution real time and fault tolerance Each pattern describes a separate design problem that needs to be solved Solutions are provided with consequences and trade offs Each solution will enable piecemeal growth of the design Finding a solution is easy as the patterns are divided into categories based on the problem field the pattern tackles The design process is guided by different aspects of quality such as performance and extendibility which are included in the pattern descriptions The book also contains an example software architecture designed by leading industry experts using the patterns in the book The example system introduces the reader to the problem domain and demonstrates how the patterns can be used in a practical system design process The example architecture shows how useful a toolbox the patterns provide for both novices and experts guiding the system design process from its beginning to the finest details Designing distributed machine control systems with patterns ensures high quality in the final product High quality systems will improve revenue and guarantee customer satisfaction As market need changes the desire to produce a quality machine is not only a primary concern there is also a need for easy maintenance to improve efficiency and productivity as well as the growing importance of environmental values these all impact machine design The software of work machines needs to be designed with these new requirements in mind Designing Distributed Control Systems presents patterns to help tackle these challenges With proven methodologies from the expert author team they show readers how to improve the quality and efficiency of distributed control systems **Signal**, 2010

Information Systems Christine Urquhart, Faten Hamad, Dina Tbaishat, Alison Yeoman, 2017-12-21 This new book takes a holistic view of information architecture to offer information professionals a vital critical analysis of library and information service architecture with discussion of methods tools techniques and trends The editors argue that library assessment literature has primarily dealt with performance measurement and change management strategies leaving little on the ways of looking at the process architecture of library and information services and on methods for business process analysis Information Systems Process and practice aims to fill that gap with a combination of theory and supporting case studies written by an international line up of contributors This book discusses research and methods that help libraries and information services work from strategic business objectives through to the organisation of processes that support the information services offered opens a new area of research investigation on the link between information behaviour research and information systems and architecture illustrated by case studies and projects uses introductory sections and chapter commentary from the editors to draw the discussions

together This will be essential reading for researchers in Information Science specifically in the areas of digital libraries information architecture and information systems It will also be useful for practitioners and students in these areas seeking to understand research issues and challenges and to discover how they have been handled in practice elsewhere
